How does Microsoft 365 Copilot work?

Overview

Microsoft 365 Copilot

Embedded across Microsoft 365 apps

Microsoft 365 Copilot in Excel

Create new formulas with Copilot in Excel

Working with the Sample Excel Sheet

Open "ExcelCopilotSample1.xlsx"

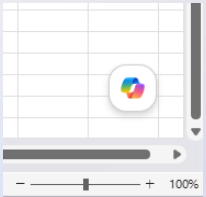

Please let the instructor know if you do not have this Excel file

Note: AutoSave needs to be enabled for M365 Copilot to work.

[illegible]

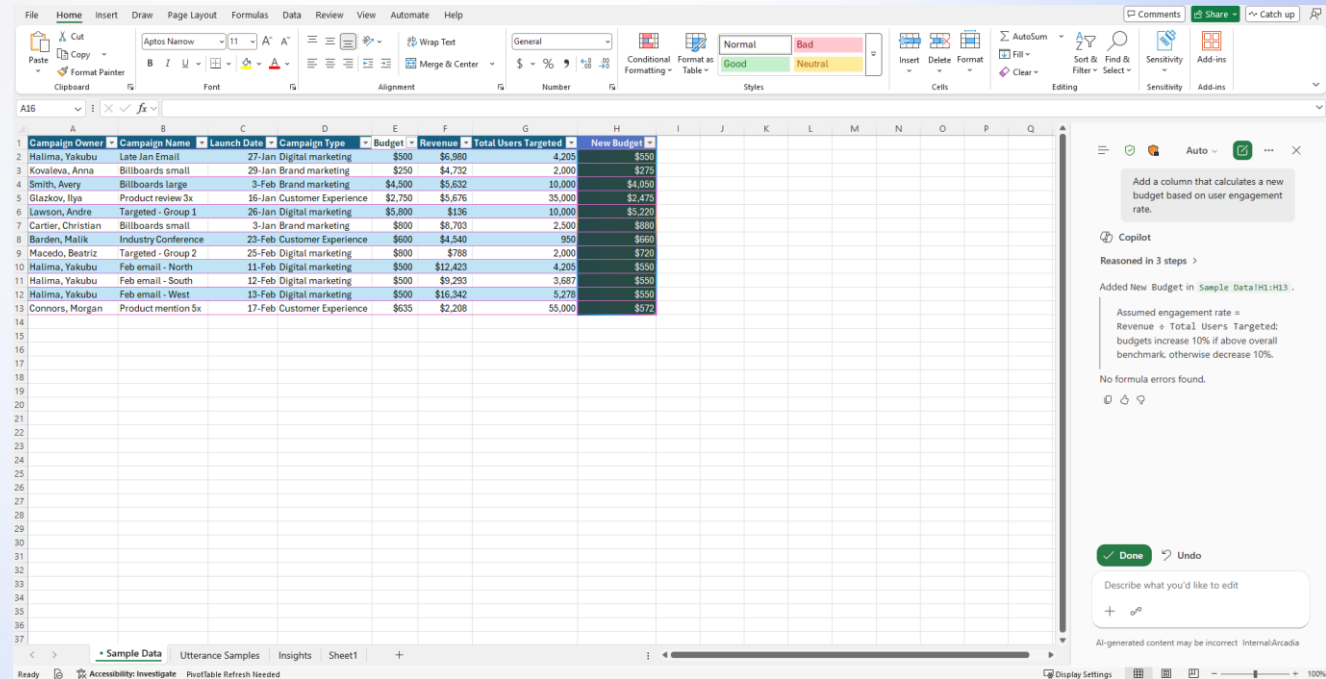

Formulate with Copilot in Excel

- Click on the Copilot button in the bottom right of your screen.

- Type the **Prompt**:

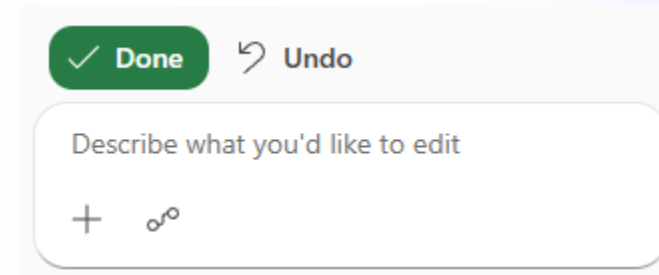

"Add a column that calculates a new budget based on user engagement rate."

Campaign Owner	Campaign Name	Launch Date	Campaign Type	Budget	Revenue	Total Users Targeted	New Budget
Halima, Yakubu	Late Jan Email	27-Jan	Digital marketing	\$500	\$6,990	4,205	\$550
Kovaleva, Anna	Billboards small	29-Jan	Brand marketing	\$250	\$4,732	2,000	\$275
Smith, Avery	Billboards large	3-Feb	Brand marketing	\$4,500	\$5,632	10,000	\$4,050
Glazkov, Ilya	Product review 3x	16-Jan	Customer Experience	\$2,750	\$5,676	35,000	\$2,475
Lawson, Andre	Targeted - Group 1	26-Jan	Digital marketing	\$5,800	\$136	10,000	\$5,220
Cartier, Christian	Billboards small	3-Jan	Brand marketing	\$800	\$6,703	2,500	\$880
Barden, Malik	Industry Conference	23-Feb	Customer Experience	\$600	\$4,540	950	\$660
Macedo, Beatriz	Targeted - Group 2	25-Feb	Digital marketing	\$800	\$788	2,000	\$720
Halima, Yakubu	Feb email - North	11-Feb	Digital marketing	\$500	\$12,423	4,205	\$550
Halima, Yakubu	Feb email - South	12-Feb	Digital marketing	\$500	\$9,293	3,687	\$550
Halima, Yakubu	Feb email - West	13-Feb	Digital marketing	\$500	\$16,342	5,278	\$550
Connors, Morgan	Product mention 5x	17-Feb	Customer Experience	\$635	\$2,208	55,000	\$572

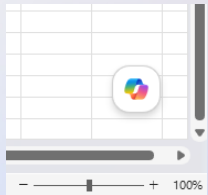

Formulate with Copilot in Excel – Part 1

- The new formula is not in our table yet.
- You must choose to either keep it by clicking on "Done" or to discard it by clicking on "Undo."

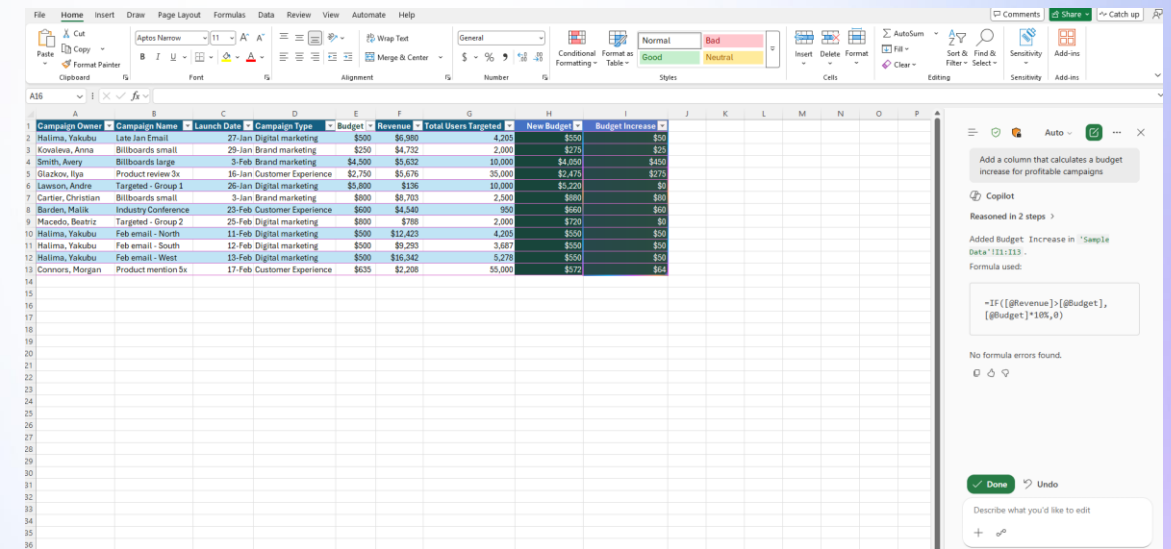

Formulate with Copilot in Excel - Part 2

- Click on the Copilot button in the bottom right of your screen.

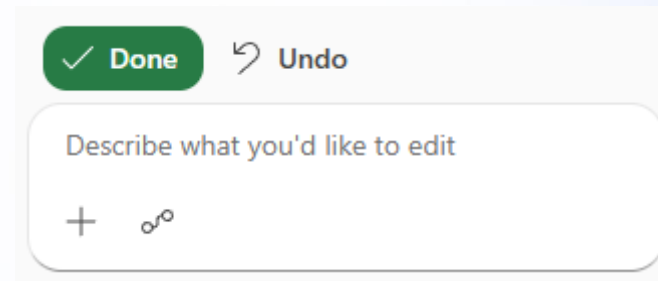

- Type the **Prompt**:

"Add a column that calculates a budget increase for profitable campaigns"

Formulate with Copilot in Excel – Part 2

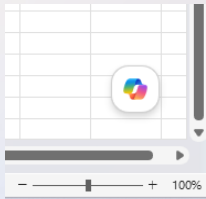

- The new formula is not in our table yet.
- You must choose to either keep it by clicking on "Done" or to discard it by clicking on "Undo."

Edit with Copilot in Excel

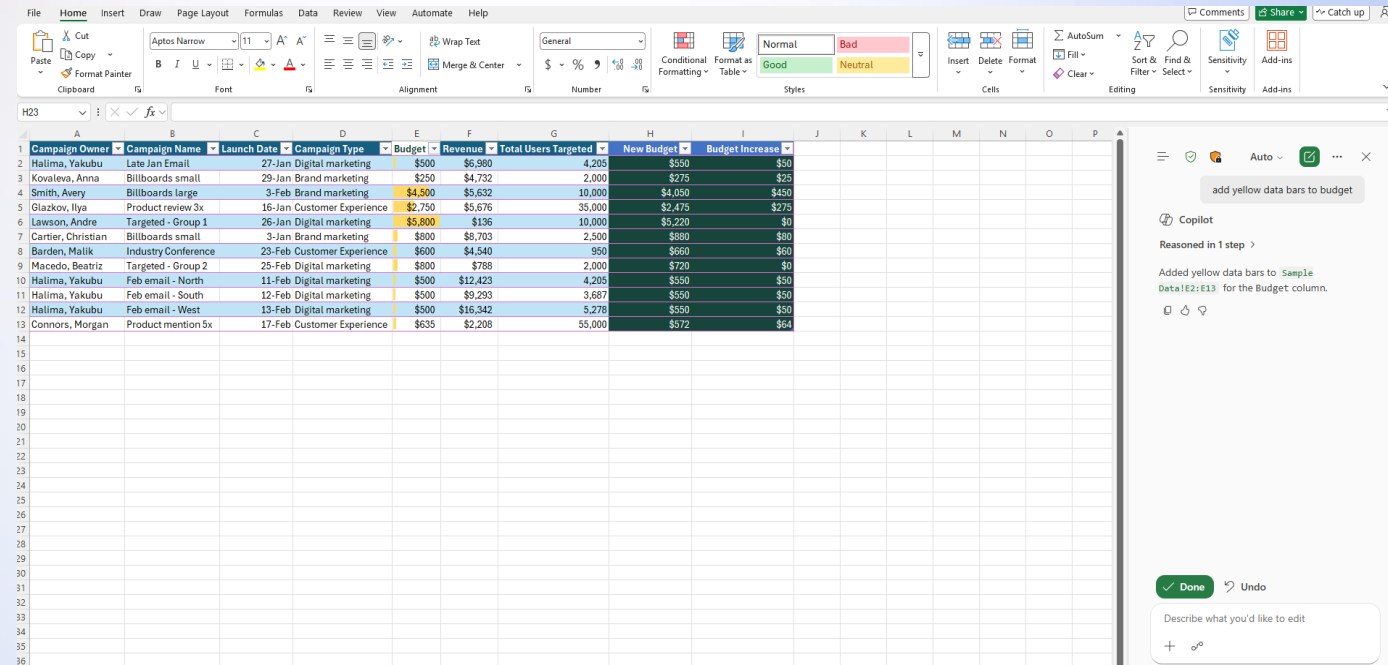

Edit with Copilot in Excel - Part 1

- Click on the Copilot button in the Bottom right of your screen.

- Type the **Prompt**:

"Add yellow data bars to Budget"

The screenshot shows the Microsoft Excel application with a marketing campaign data table. The Copilot sidebar is open on the right, displaying a prompt and the resulting action.

Campaign Owner	Campaign Name	Launch Date	Campaign Type	Budget	Revenue	Total Users Targeted	New Budget	Budget Increase
Halima, Yakubu	Late Jan Email	27-Jan	Digital marketing	\$500	\$6,980	4,205	\$550	\$50
Kovaleva, Anna	Billboards small	29-Jan	Brand marketing	\$250	\$4,732	2,000	\$275	\$25
Smith, Avery	Billboards large	3-Feb	Brand marketing	\$4,500	\$5,652	10,000	\$4,650	\$150
Oladkov, Ilya	Product review 3x	16-Jan	Customer Experience	\$2,750	\$5,676	35,000	\$2,475	\$275
Lawson, Andre	Targeted - Group 1	26-Jan	Digital marketing	\$5,800	\$136	10,000	\$5,220	\$580
Cartier, Christian	Billboards small	3-Jan	Brand marketing	\$900	\$8,703	2,500	\$880	\$80
Barden, Malik	Industry Conference	23-Feb	Customer Experience	\$600	\$4,540	950	\$660	\$60
Macedo, Beatriz	Targeted - Group 2	25-Feb	Digital marketing	\$800	\$788	2,000	\$720	\$80
Halima, Yakubu	Feb email - North	11-Feb	Digital marketing	\$500	\$12,423	4,205	\$550	\$50
Halima, Yakubu	Feb email - South	12-Feb	Digital marketing	\$500	\$9,293	3,667	\$550	\$50
Halima, Yakubu	Feb email - West	13-Feb	Digital marketing	\$500	\$16,342	5,278	\$550	\$50
Connors, Morgan	Product mention 5x	17-Feb	Customer Experience	\$635	\$2,208	55,000	\$572	\$64

The Copilot sidebar on the right shows the following prompt and action:

Prompt: add yellow data bars to budget

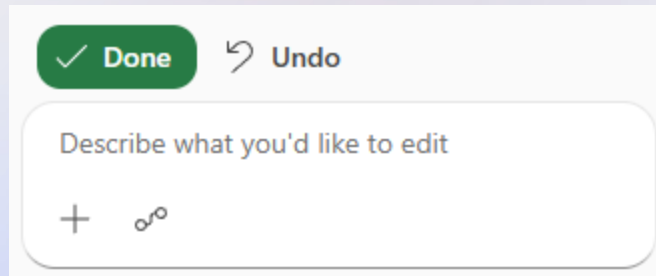

Reasoned in 1 step

Action: Added yellow data bars to sample data!E2:E13 for the Budget column.

Buttons: Done, Undo, Describe what you'd like to edit

Edit with Copilot in Excel - Part 1

- Copilot will show what it executed and will provide an option to keep or undo this change.

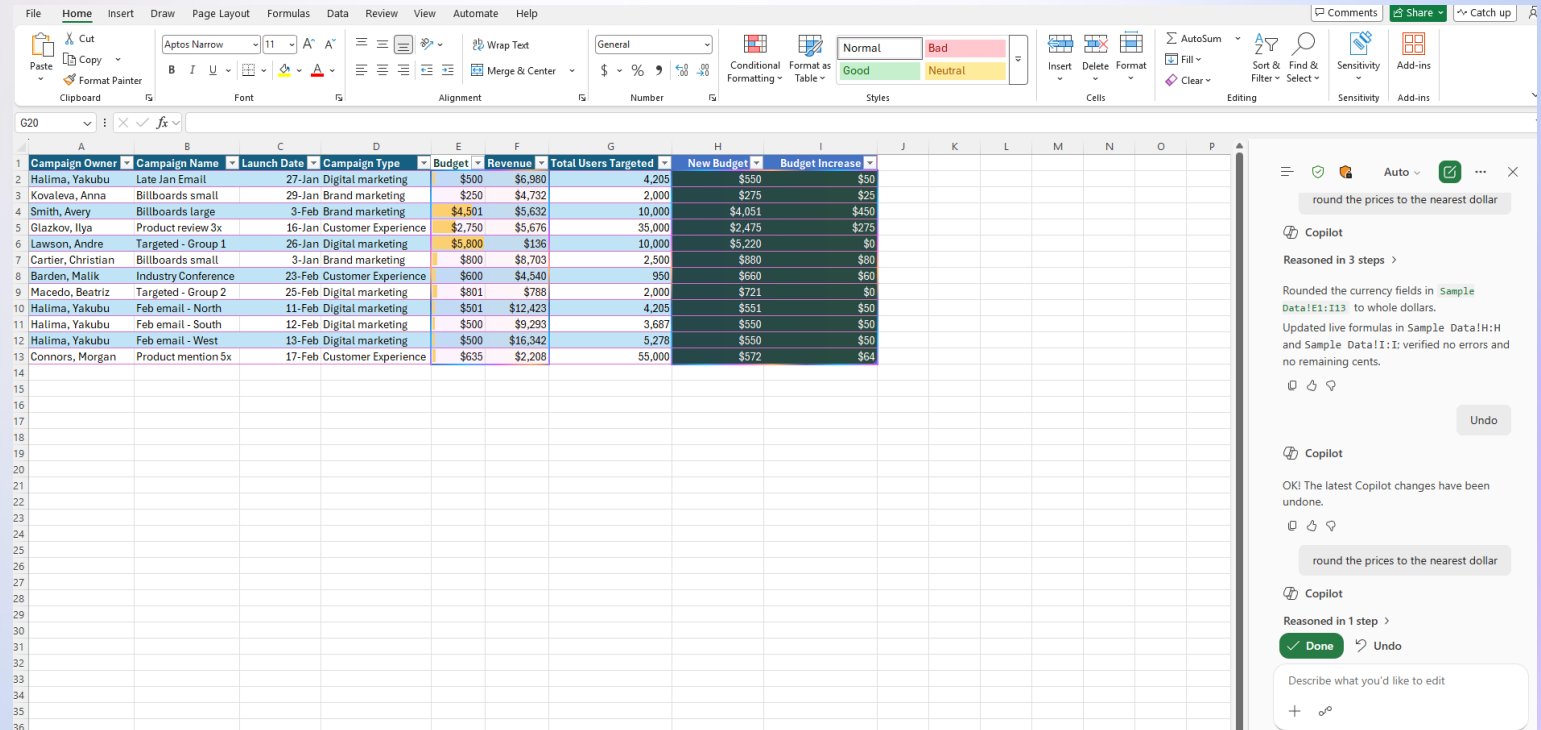

Campaign Type ▾	Budget ▾	Revenue ▾
Digital marketing	\$500.34	\$6,980
Brand marketing	\$250.12	\$4,732
Brand marketing	\$4,500.88	\$5,632
Customer Experience	\$2,750.00	\$5,676
Digital marketing	\$5,800.01	\$136
Brand marketing	\$800.00	\$8,703
Customer Experience	\$600.22	\$4,540
Digital marketing	\$800.75	\$788
Digital marketing	\$500.99	\$12,423
Digital marketing	\$500.00	\$9,293
Digital marketing	\$500.00	\$16,342
Customer Experience	\$635.00	\$2,208

Edit with Copilot in Excel - Part 2

- Type the **Prompt**:

"Round the prices to the nearest dollar"

The screenshot displays the Microsoft Excel interface with a table of marketing campaign data. The table has columns for Campaign Owner, Campaign Name, Launch Date, Campaign Type, Budget, Revenue, Total Users Targeted, New Budget, and Budget Increase. The data is organized into rows, with some cells highlighted in blue and others in orange. The Copilot interface is visible on the right side of the screen, showing a prompt area where the user has entered the text "Round the prices to the nearest dollar". The Copilot response indicates that it has rounded the currency fields in the sample data to whole dollars and updated the live formulas in the sample data. The interface also includes buttons for "Done", "Undo", and "Describe what you'd like to edit".

Understand your Data with Copilot in Excel

Understand your data with Copilot in Excel

Copilot can help you gain insights on your data.

- Type the **Prompt**:

"How does revenue generated by different campaign types compare?"

Understand your data with Copilot in Excel

Copilot, in seconds, will illustrate Revenue by Marketing Type. A description will also be included.

The information will automatically be added to a new worksheet for you. Simply click "Done" to accept it.

 Copilot

Reasoned in 3 steps >

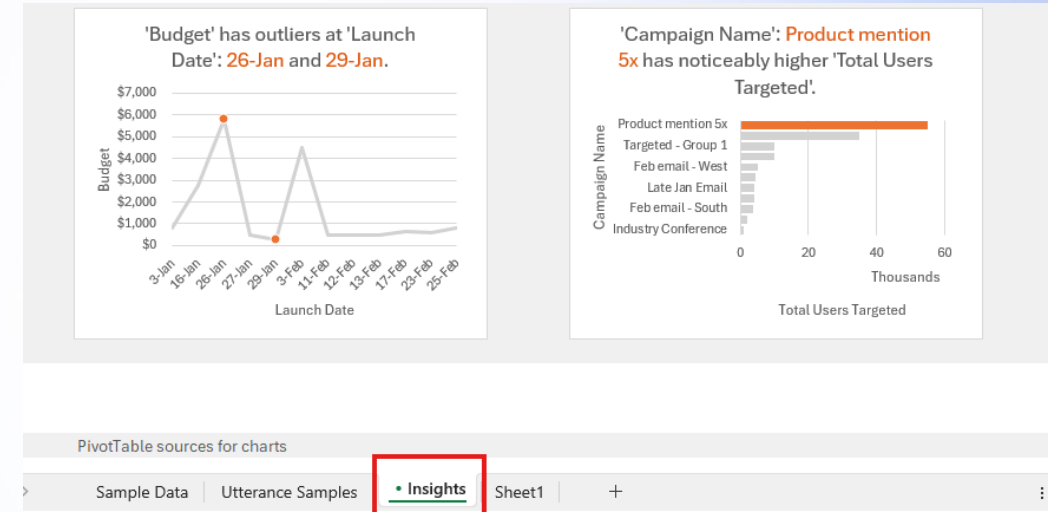

Created `Insights!P2:R6` and chart `Insights!Revenue by Campaign Type`.

Digital marketing leads with \$45,962 revenue (59.3%), followed by Brand marketing at \$19,067 and Customer Experience at \$12,424.

Used live SUMIFS formulas from `Table1[Revenue]`.

Tips for editing with Copilot in Excel

Tips for editing with Copilot in Excel

Tips for using editing with Copilot in Excel

- Start with a clear intent—describe your desired outcome, not every step.
- Use natural language; Copilot understands context and can iterate with you.
- We encourage using existing familiar datasets as well to see the power of Copilot building within your existing Excel workbooks.
- Leverage web search, file upload, or enterprise search to bring in the latest data, and choose between OpenAI and Anthropic models for flexibility.

Well-constructed prompts should include:

1. State your output goal. (report, dashboard, model etc.)
2. Specify or upload any specific data/content needed. (categories, products, dates etc.)
3. Ask for any specific formatting or Excel objects. (charts, tables, conditional formatting).

Visit: <https://aka.ms/Excel/EditingWithCopilot/Support> for more guidance.

Let's edit your workbook

Copilot will respond in chat only.

Analyze this workbook and add data insights

Create from scratch (Excel Agent or Edit with Copilot)

Financial model

Create a discounted cash flow (DCF) model including Balance Sheet, Cash Flows, and Income Statement for a mid-size software company. Assume free cash flows start at \$10 million in year 1, growing at 12% annually for 5 years. Use a discount rate of 9% and a terminal growth rate of 2%. Use standard financial formatting and include sensitivity analysis tables. Add a selector for best, base, and worst-case scenarios.

Project tracking

*Create a full project tracking system that includes tasks, owners, milestones, budgets, and risk ratings grounded in recent workback plans, sprint notes, and budget files using **[upload files]**. Generate a Gantt-style timeline, conditional formatting for at-risk or overdue tasks, and a dashboard with burndown charts, budget tracking, and a risk heatmap. Provide a status-ready summary section that can be exported for leadership updates.*

Scenario modeling

*Build a multi-year model using historical revenue, cost, pipeline, renewal, and pricing guidance data in **[Dataset.xlsx]**. Include full P&L, cash flow, and balance sheet views with linked assumptions, driver-based forecasting, and base/upside/downside scenarios. Incorporate sensitivity analysis on key variables such as price, win rate, and churn. Produce error checks, a dashboard of charts, and a one-page executive summary of the model.*

Market forecast

Build a US market forecast for smart fitness apparel from 2025-2030. Use the latest data on activewear sales by segment and growth rates. Build a model with adjustable assumptions and a chart showing revenue by segment.

Follow up: Add a sheet with segment-specific breakdowns including charts.

Build on existing data (Edit with Copilot in Excel)

Operations

Build me a view of our inventory levels across locations, products, and warehouses. Identify items at risk of selling out and reallocate inventory to optimize order fulfillment.

Sales

Where is growth coming from? Decompose growth into New Customers, Total Customers, and Total Seats. Show regions where seat growth outpaces new customer growth with charts to see the trends.

Insights and visuals

Review our 2025 YTD sales and pull the top insights across products and regions: trends, drivers, risks, and opportunities. Then build an executive summary dashboard with charts that highlight our top sales trends.

Refresh data (multi-model)

*Replicate last week's analysis in a new sheet using the latest numbers shared in **[Monthly Business Review.docx]** and show top insights on how our business is performing (GPT).*

Now help me turn it into something easy to share, with visualizations of customer churn trends and clearly highlight the areas of concern (Claude).
