Summarize with Copilot in OneNote

Sometimes you need to take a lot of notes quickly, which can make your notes difficult to understand later.

Summarize makes it easy to make sense of an entire section by default, a selection of text, and a specific topic or feature.

From the Home ribbon, click on the Copilot button.

- Type the **Prompt:**

“Summarize this page.”

The screenshot displays the Microsoft OneNote application interface. The main note, titled "Solar Solutions Inc.", is open. The left sidebar shows the notebook structure with sections like "About Us", "Solar Solutions Inc.", and "Weekly Sync". The top ribbon includes "File", "Home", "Insert", "Draw", "View", and "Help". The "Home" ribbon is active, showing the "Copilot" button. The main content area contains the following text:

Solar Solutions Inc.

Monday, June 29, 2026 6:34 PM

- **Project Details:**
 1. Conduct a site assessment and energy audit to determine the optimization and size of the solar system
 2. Design and install the solar system, which will consist of:
 - i. 200 solar panels
 - ii. 10 inverters
 - iii. Backup battery
 3. Provide training and support to the staff on how to operate and monitor the solar system.

Training will include:

 - i. Safety and environmental law and compliance
 - ii. Customer service skills
 - iii. Trouble shooting and resources for repairs
 4. Perform regular maintenance/inspections to ensure the solar system is functioning properly.

The flow will take approx. 6 months to complete, with inspections occurring for the duration of the contract

Solar Solutions Inc. works with small/medium businesses in the area.

We are passionate about renewable energy because solar energy is a crucial step towards creating a sustainable future for our planet! It starts with our local businesses!

Renewable energy sources, such as solar, wind, and hydro power, produce little to no greenhouse gas emissions, reducing our carbon footprint and mitigate the effects of climate change. Additionally, renewable energy is often more cost effective in the long run, providing a reliable and affordable source of power for individuals, businesses, and

The Copilot sidebar on the right shows the prompt "summarize this page" and the resulting summary:

Copilot

Summary: Solar Solutions Inc.

Solar Solutions Inc. is a renewable energy company focused on helping small and medium-sized businesses adopt solar power solutions. The company is undertaking a solar installation project that includes an initial site assessment and energy audit, followed by the design and installation of a system consisting of 200 solar panels, 10 inverters, and a backup battery system.

The project also includes a comprehensive training program for customer staff covering:

- Safety and environmental compliance
- Customer service skills
- Troubleshooting procedures and repair resources
- System operation and monitoring

In addition, Solar Solutions Inc. will provide ongoing maintenance and inspections to ensure the solar system continues to operate effectively.

The overall project is expected to take approximately six months, with inspections continuing throughout the duration of the

Project Summary: Solar Solutions Inc.

Objective
Solar Solutions Inc. will design, install, and support a solar energy system for a small or medium-sized business customer.  Solar Solutions Inc.

Key Project Activities

- Conduct a **site assessment and energy audit** to determine the optimal system configuration and sizing.  Solar Solutions Inc.
- Design and install a solar power system consisting of:
 - 200 solar panels
 - 10 inverters
 - Backup battery storage system Solar Solutions Inc.
- Provide staff training covering:
 - Safety and environmental compliance requirements
 - Customer service skills
 - Troubleshooting procedures and repair resources Solar Solutions Inc.
- Perform ongoing **maintenance and inspections** to ensure the system continues operating effectively.  Solar Solutions Inc.

Draft a To-Do List with Copilot in OneNote

During long planning sessions, follow-up tasks can get lost in the details.

You can create To-Do lists from your One Note:

1. Selections
2. Pages
3. Sections.

- From the Home ribbon, click on the Copilot button.
- Type the **Prompt:**

“Create a To-Do List.”

Pros and Cons with Copilot in OneNote

Copilot can take your information and give you intelligent insights that give you clarity and guidance on your notes.

Insights can include prompts like “What’s missing with the project plan on this page,” “Give me pros and cons on my idea,” and “How can I improve this development plan?”

- From the Home ribbon, click on the Copilot button.
- Type the **Prompt:**

“List the pros and cons of the Project Details.”

The screenshot displays a OneNote page for 'Solar Solutions Inc.' dated Monday, June 29, 2026, at 6:34 PM. The page content includes:

- Project Details:**
 1. Conduct a site assessment and energy audit to determine the optimization and size of the solar system
 2. Design and install the solar system, which will consist of:
 - i. 200 solar panels
 - ii. 10 inverters
 - iii. Backup battery
 3. Provide training and support to the staff on how to operate and monitor the solar system.
Training will include:
 - i. Safety and environmental law and compliance
 - ii. Customer service skills
 - iii. Trouble shooting and resources for repairs
 4. Perform regular maintenance/inspections to ensure the solar system is functioning properly.

A flowchart illustrates the process: Assessment → Design/Install → Training → Inspections. A feedback loop arrow connects Inspections back to Training. A note states: 'The flow will take approx. 6 months to complete, with inspections occurring for the duration of the contract'.

Below the flowchart, text reads: 'Solar Solutions Inc. works with small/medium businesses in the area. We are passionate about renewable energy because solar energy is a crucial step towards creating a sustainable future for our planet! It starts with our local businesses! Renewable energy sources, such as solar, wind, and hydro power, produce little to no greenhouse gas emissions, reducing our carbon footprint and mitigate the effects of climate change. Additionally, renewable energy is often more cost effective in the long run, providing a reliable and affordable source of power for individuals, businesses, and'.

The right sidebar shows the Copilot interface with the prompt: 'list the pros and cons of the project details'. It lists three generated insights:

- 1. Comprehensive End-to-End Solution**
The project includes assessment, design, installation, training, support, and ongoing maintenance rather than simply installing equipment. This reduces the likelihood of operational issues after deployment.
- 2. Energy Cost Savings Potential**
Installing 200 solar panels with battery backup could significantly reduce electricity costs for the customer over time, particularly if energy prices increase. The document also highlights renewable energy as a cost-effective long-term power source.
- 3. Environmental Benefits**
The project aligns with sustainability goals by using renewable energy that produces little to no...

Pros and Cons with Copilot in OneNote

You can specify a section, selected text, topic or feature to extract a pro/con list for.

The screenshot displays a OneNote page with a document about solar energy. The document includes text such as "the optimization and size of the", "and monitor the solar system.", "lar system is functioning", "Inspections", "The flow will take approx. 6 months to complete, with inspections occurring for the duration of the contract", "ve area.", "ergy is a crucial step towards creating a sustainable", and "ver, produce little to no greenhouse gas emissions, ate change. Additionally, renewable energy is often fordable source of power for individuals, businesses, and". There is an image of a solar panel and a lightbulb icon.

The Copilot sidebar on the right shows a user prompt: "give me the pros and cons of the solar solutions project". The Copilot response is as follows:

Copilot
Based on the project description in **Solar Solutions Inc.**, here are the key advantages and disadvantages of the project as described.
Solar Solutions Inc.

Pros

- 1. Environmental Benefits**
The project promotes the use of renewable energy, which produces little to no greenhouse gas emissions. The document specifically identifies solar energy as a way to reduce carbon footprint and help mitigate climate change.
Solar Solutions Inc.
- 2. Reduced Long-Term Energy Costs**
The project notes that renewable energy can be more cost-effective in the long run, providing businesses with a reliable and affordable power source. Small and medium-sized businesses could potentially reduce their utility expenses over time.
Solar Solutions Inc.
- 3. Energy Resilience**
Including a backup battery improves power

At the bottom of the sidebar is a "Message Copilot" input field with a plus sign and a microphone icon.

Rewrite with Copilot in OneNote

Writing your first draft is hard, but rewriting can be harder. Copilot in OneNote can help you by rewriting your content for tone, style, formality, and even length. You can also ask Copilot to provide several options for its rewritten responses.

- From the Home ribbon, click on the Copilot button.
- Type the **Prompt:**

“Rewrite the Fun Facts Section.”

i. 200 solar panels
ii. 10 inverters
iii. Backup battery

3. Provide training and support to the staff on how to operate and monitor the solar system.
Training will include:
i. Safety and environmental law and compliance
ii. Customer service skills
iii. Trouble shooting and resources for repairs

4. Perform regular maintenance/inspections to ensure the solar system is functioning properly.

Assessment → Design/Install → Training → Inspections

The flow will take approx. 6 months to complete, with inspections occurring for the duration of the contract

Solar Solutions – About Us
Solar Solutions Inc. works with small/medium businesses in the area.

We are passionate about renewable energy because solar energy is a crucial step towards creating a sustainable future for our planet! It starts with our local businesses!

Renewable energy sources, such as solar, wind, and hydro power, produce little to no greenhouse gas emissions, reducing our carbon footprint and mitigate the effects of climate change. Additionally, renewable energy is often more cost effective in the long run, providing a reliable and affordable source of power for individuals, businesses, and communities.

By being passionate about renewable energy, we can drive innovation, create jobs, and build a cleaner, healthier, and more sustainable world for future generations!

About Us
Solar Solutions Inc.

At Solar Solutions Inc., we help small and medium-sized businesses transition to clean, reliable, and cost-effective solar energy solutions. Our team specializes in designing, installing, and maintaining customized solar power systems that enable organizations to reduce energy costs, improve sustainability, and increase energy independence.

We believe that renewable energy is more than a technology investment—it's a commitment to a stronger, more sustainable future. By harnessing the power of the sun, businesses can reduce their environmental impact while benefiting from long-term energy savings and greater operational resilience.

Our end-to-end approach includes site assessments, system design, installation, staff training, ongoing support, and preventive maintenance, ensuring our customers achieve maximum value from their solar investment.
