How does Microsoft 365 Copilot in Teams work?

Overview

Microsoft 365 Copilot

Embedded across Microsoft 365 apps

Copilot in Teams

Considerations

The meeting **must be transcribed** to enable Copilot.*

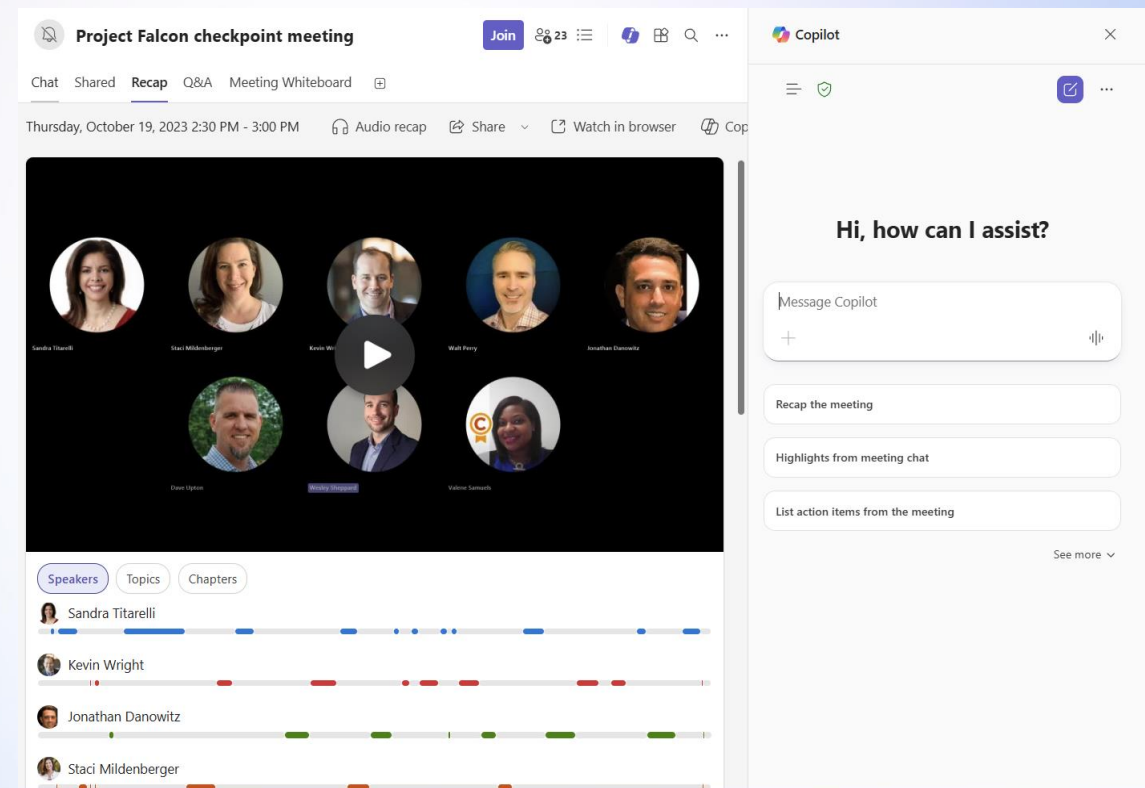

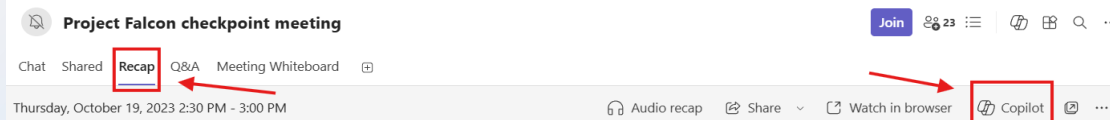

Copilot **won't work** in meetings that are **hosted outside the participant's organization.**

After a Meeting: Copilot in Teams

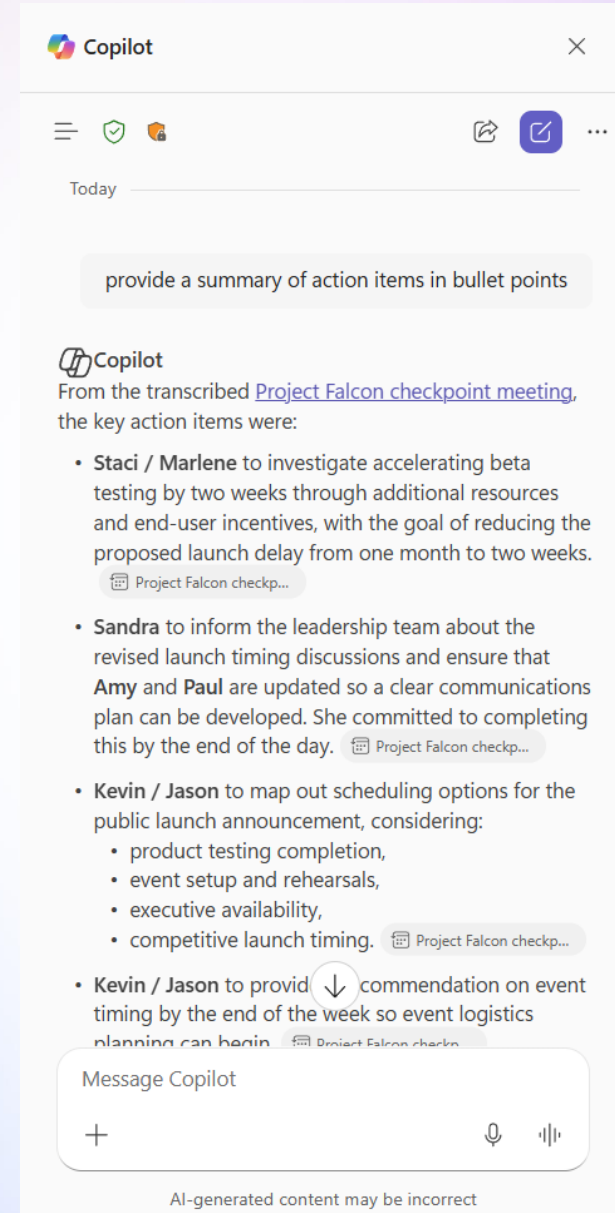

- 1) From your calendar, **Open a meeting that has been recorded or transcribed.**
- 2) In the meeting toolbar, select **“Recap.” > “Copilot.”**

- Type the **Prompt**:

“Provide a summary of action items in bullet points.”

Enjoy more productive meetings
or hear what you missed with
Copilot in Microsoft Teams.

Copilot

Today

provide a summary of action items in bullet points

Copilot

From the transcribed [Project Falcon checkpoint meeting](#), the key action items were:

- **Staci / Marlene** to investigate accelerating beta testing by two weeks through additional resources and end-user incentives, with the goal of reducing the proposed launch delay from one month to two weeks. [Project Falcon checkp...](#)
- **Sandra** to inform the leadership team about the revised launch timing discussions and ensure that **Amy** and **Paul** are updated so a clear communications plan can be developed. She committed to completing this by the end of the day. [Project Falcon checkp...](#)
- **Kevin / Jason** to map out scheduling options for the public launch announcement, considering:
 - product testing completion,
 - event setup and rehearsals,
 - executive availability,
 - competitive launch timing. [Project Falcon checkp...](#)
- **Kevin / Jason** to provide [↓](#) commendation on event timing by the end of the week so event logistics planning can begin. [Project Falcon checkp...](#)

- Type the **Prompt**:

“What questions were unresolved?”

“Generate meeting notes.”

“Suggest follow-up questions.”

Copilot

Today

what questions are unresolved?

Copilot
From the transcript of [Project Falcon checkpoint meeting](#), several items were not resolved during the meeting and were left as follow-up actions or open decisions.

1. Can beta testing be accelerated?
The team agreed that Marlene (product lead) would investigate whether additional resources and end-user incentives could speed up beta testing by two weeks. The outcome was not known during the meeting.
 Project Falcon checkpoint meeting

Open question:

- Can beta testing be compressed enough to reduce the launch delay from one month to two weeks?

Copilot

Today

suggest follow-up questions

Copilot
Based on the discussion in [Project Falcon checkpoint meeting](#), these are the follow-up questions I would ask to drive the project toward a final launch decision:
 Project Falcon checkpoint meeting +1

Launch Readiness

- Has the accelerated beta testing plan been approved and staffed with the additional resources Marlene requested? Project Falcon checkpoint meeting
- Are there any critical defects, usability issues, or certification risks remaining before the August 29 testing completion target? Project Falcon checkpoint meeting
- Is the revised two-week launch delay still achievable, or has new testing data changed the recommendation? Project Falcon checkpoint meeting

Executive Communications

FAQ: Contoso NextGen Camera — Project Aurora

1. What is Project Aurora?

Project Aurora is the codename for the proposed Contoso NextGen Camera, a hybrid still/video camera platform designed for professional creators, field service teams, retailers, and travel photographers. It combines a 48 MP stacked sensor, on-device AI scene optimization, secure cloud sync, and modular accessories in a compact mirrorless body. 

2. What is the recommended next step?

The planning recommendation is to proceed to an Alpha build with a focused scope: creator workflows, secure field capture, and retail content packs. The first release should prioritize reliability, battery life, privacy controls, and tight integration with Contoso Cloud Gallery over experimental features. 

3. Who are the primary target customers?

The major personas are independent creators, field inspectors, retail content leads, and travel photographers. Each group has different needs, including faster content turnaround, secure evidence capture, repeatable product photography, and lightweight high-quality travel gear. 

4. What is the core product promise?

The product narrative is: "professional capture, intelligent assist, trusted workflow." Aurora is positioned as a camera that helps users capture publish-ready content faster without sacrificing creative control. 

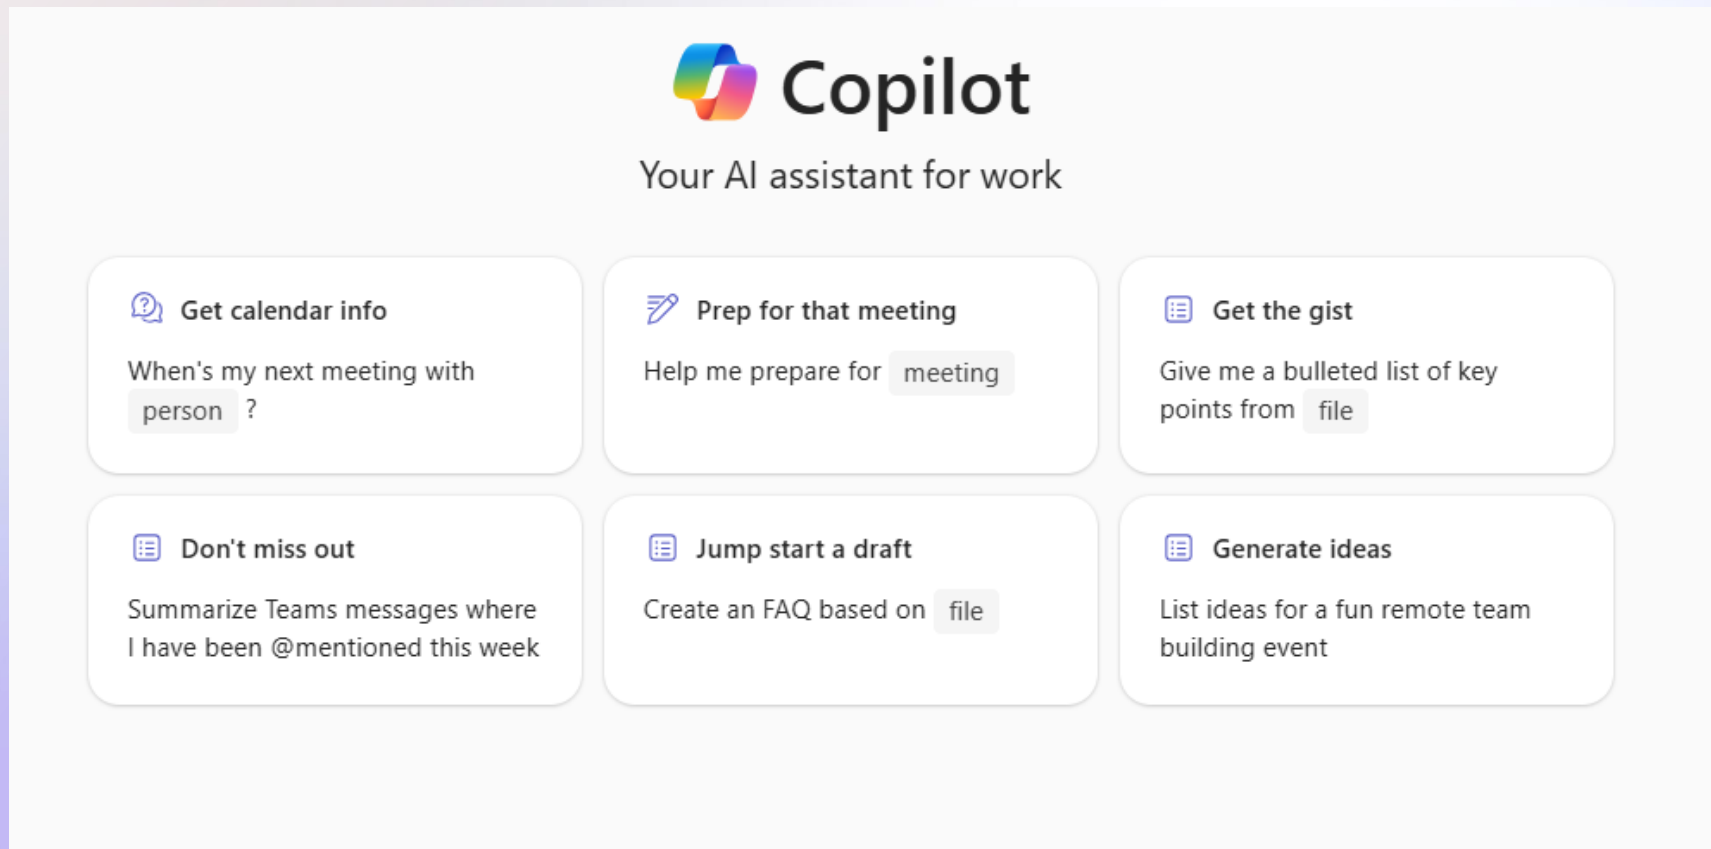

5. What are the headline camera specifica
