Introduction

The Microsoft 365 Copilot Hands-on Experience is a series consisting of 5 sessions, where each section focuses on Microsoft 365 Copilot enabled application. This Hands-on Experience is delivered in a way that will enable the new Microsoft 365 Copilot users to become power users. Prompts and files are given to participants, and they are encouraged to follow along.

Required Documents:

1. Contoso Marketing Plan.docx
2. Contoso Marketing Plan.pdf

Copilot in Word: Introduction

Copilot in Word ushers in a new era of writing. It can help you go from a blank page to a finished document in a fraction of the time it would take to compose text on your own. While it may write exactly what you need, sometimes it may be "usefully wrong" thus giving you some helpful inspiration. Additionally, Microsoft 365 Copilot Chat can provide helpful actions based on your document content or obtain additional content from outside resources.

If you are looking for something more generic, beyond what is in your draft, you can ask Microsoft 365 Copilot Chat questions to research, ideate, or iterate on for content to add.

Copilot in Word: Use Cases

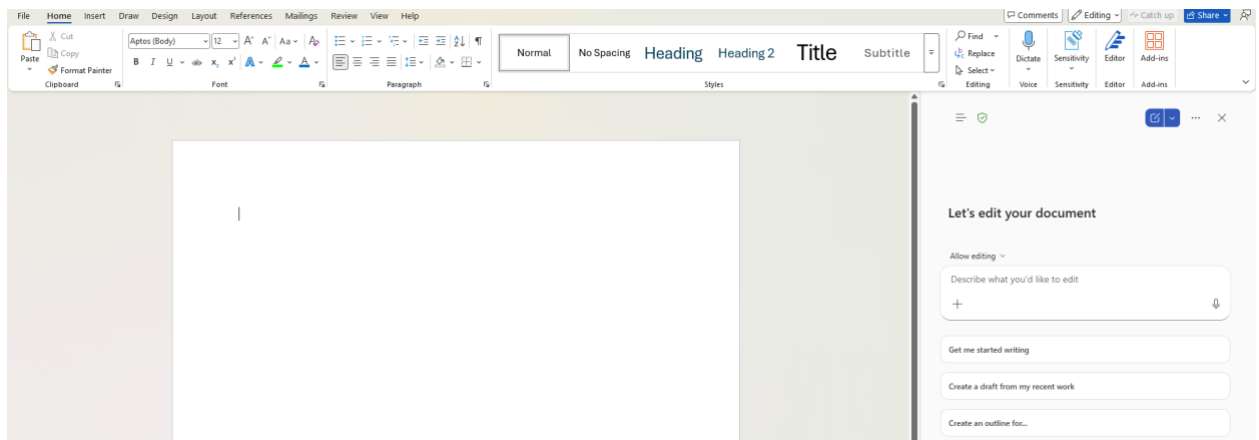

Users will start with a new document and create a Solar Panel Guide from scratch. Once the Solar Panel Guide is created with Microsoft 365 Copilot, users will navigate to the end of the document and be inspired by Microsoft 365 Copilot after clicking "Inspire Me." This will be the last step to complete the newly created Solar Panel Guide. After this, users will interact with the Contoso Marketing Plan to gather information quickly, as well as visualize content as a table. Users will complete Copilot in Word session with two documents comprehended, edited, and formatted efficiently with Copilot in Word.

Use Case 1: Creating a new document with Copilot in Word

Assume you are researching the latest information about Solar Panels. You would like to create a guide for employees and leaders who may not be familiar with these concepts. You are struggling to get a first draft started and use Copilot in Word to get started. This exercise allows you to practice prompting and create new content from scratch with M365 Copilot in Word.

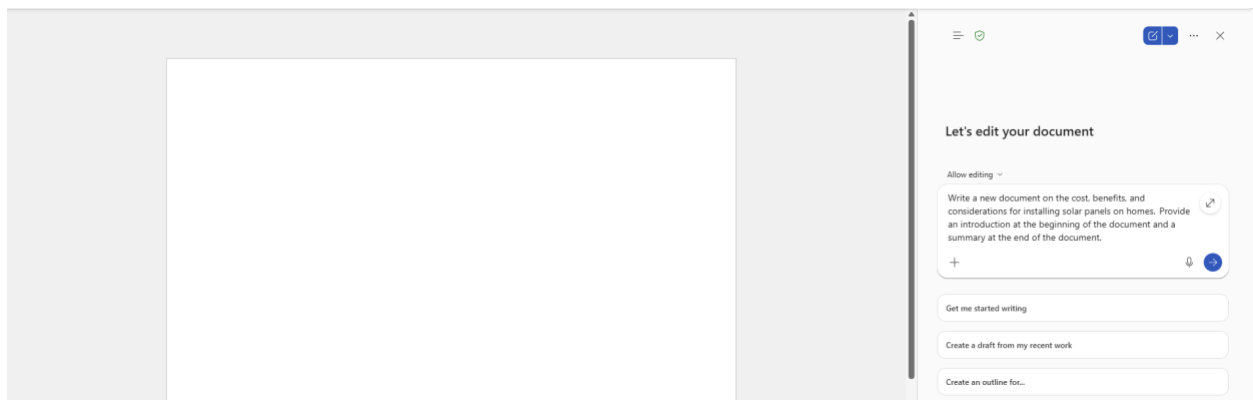

1. Open a blank Word Document. Click on the Copilot Icon in the bottom Right corner.

Then prompt M365 Copilot or start drafting in "Describe what you'd like to edit".

"Write a new document on the cost, benefits, and considerations for installing solar panels on homes. Provide an introduction at the beginning of the document and a summary at the end of the document."

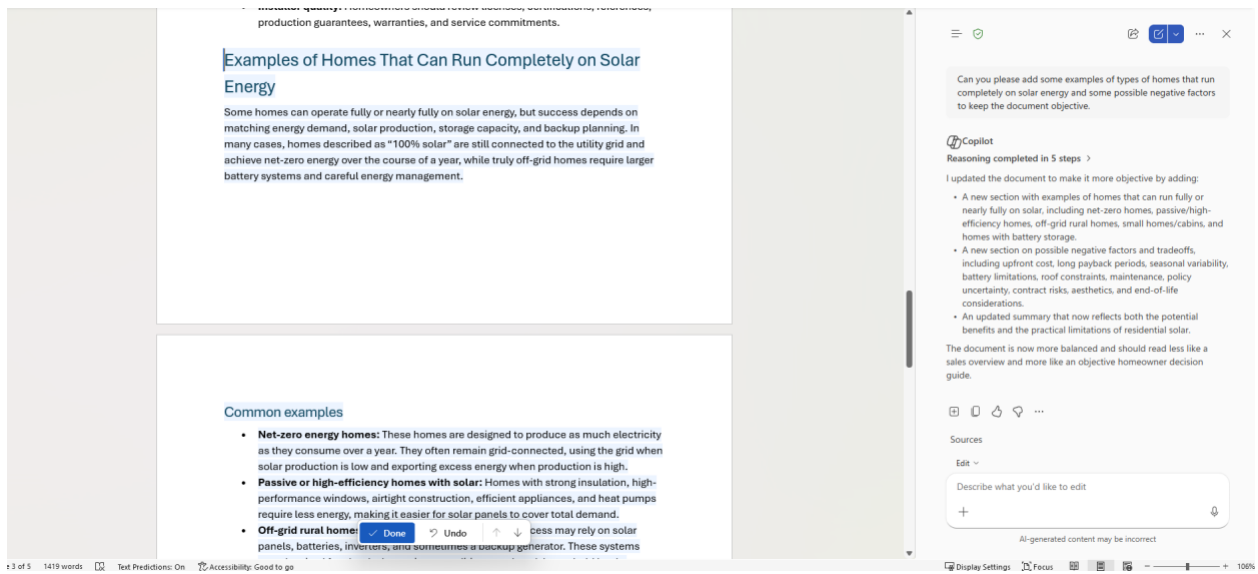

Copilot generates a document for you. You can select "Done" to retain it or make further refinements, or choose "Undo" to remove the changes. Copilot-created content stays highlighted in blue until you choose "Done". Select done and then let's refine it with the prompt below:

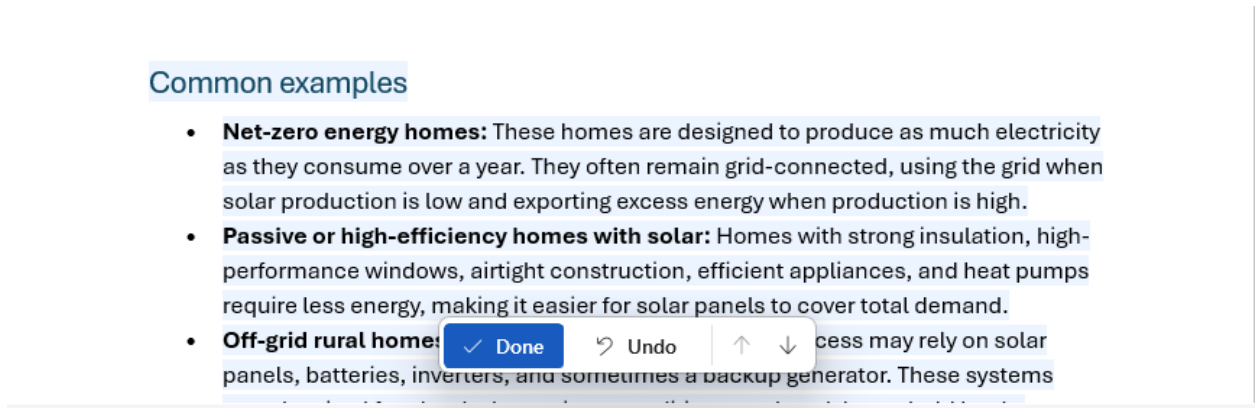

“Can you please add some examples of types of homes that run completely on solar energy and some possible negative factors to keep the document objective.”

Note: There is a 2000-character limit in prompts. The more specific the prompt, the better. A general prompt will yield a general response that the user may not be satisfied with. The above prompt is a great prompt to start off with. Check out Microsoft's resources on all things Prompting.

Click the arrow to add the new edits.

Note that you have the option to keep your draft or undo. Continue to refine until you are satisfied with your draft. This refined version contains both examples of homes as well as a list of negative considerations so “Done” is selected and the blue highlighting disappears.

Common examples

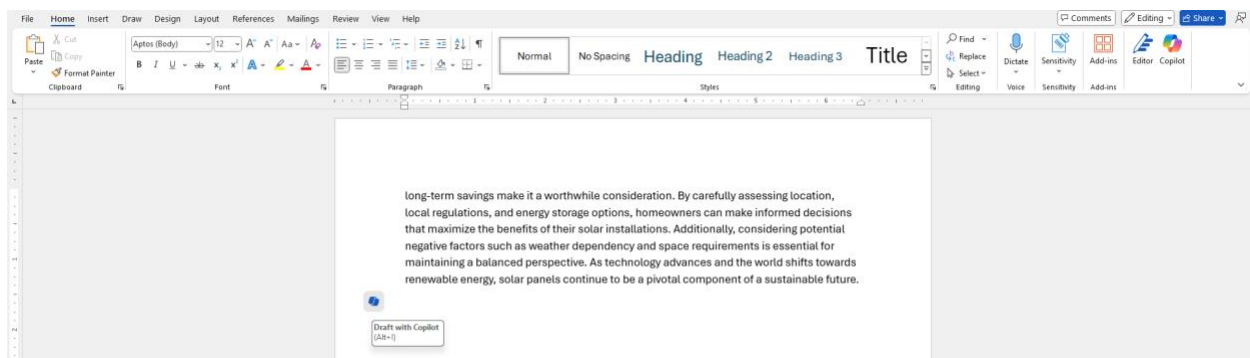

- **Net-zero energy homes:** These homes are designed to produce as much electricity as they consume over a year. They often remain grid-connected, using the grid when solar production is low and exporting excess energy when production is high.
- **Passive or high-efficiency homes with solar:** Homes with strong insulation, high-performance windows, airtight construction, efficient appliances, and heat pumps require less energy, making it easier for solar panels to cover total demand.
- **Off-grid rural homes:** Homes without practical utility access may rely on solar panels, batteries, inverters, and sometimes a backup generator. These systems

1.2. Your “Installing Solar Panels on Homes: Costs, Benefits, and Considerations” guide is now created with Copilot in Word.

Note: Users may experience a different variation of this Microsoft 365 Copilot generated content. This is normal and to be expected.

1.3. Navigate to the end of the document. Go to a new line, so that “Draft with Copilot” appears.

Tip: The Copilot icon will not appear if you are not on a new line.

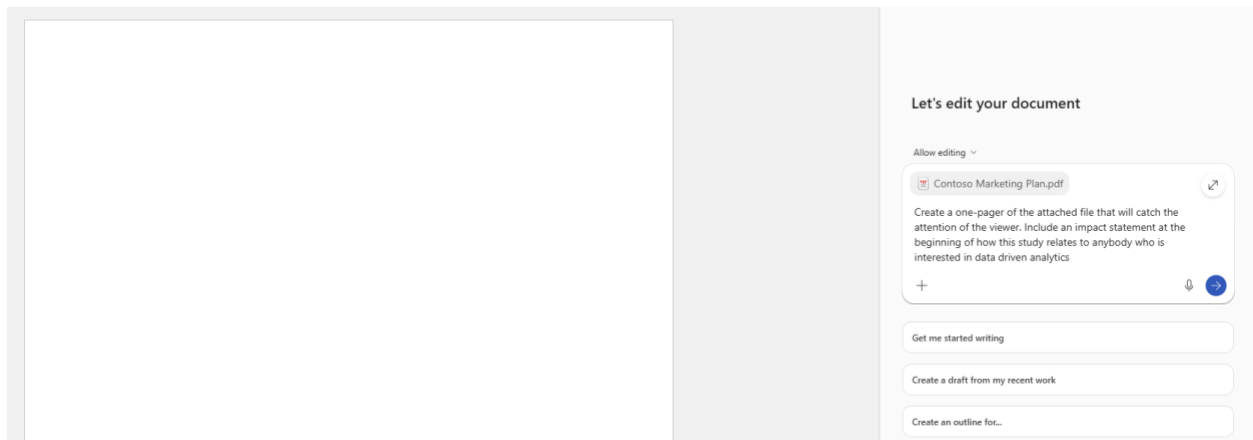

1.4. Next, users will be using a pdf to create a one-pager on the emerging trends and implications of data driven analytics.

1.5. Open a new blank Word Document. Ensure that the “Contoso Marketing Plan.pdf” document is stored in your OneDrive. Copilot cannot reference documents that are stored locally or on a hard drive.

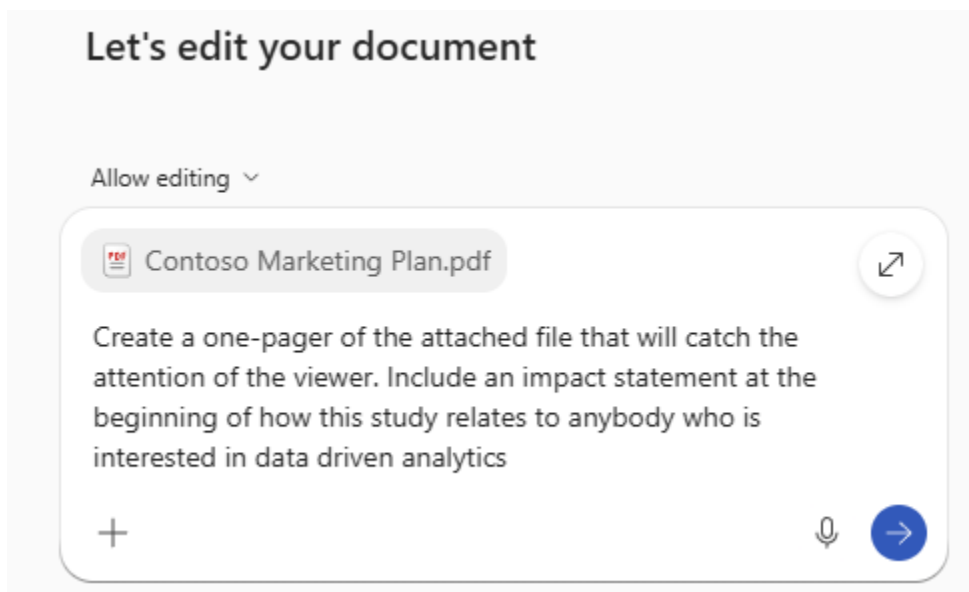

1.6. Using Copilot (in “Allow Editing Mode”), prompt Copilot:

“Create a one-pager of the attached file that will catch the attention of the viewer. Include an impact statement at the beginning of how this study relates to anybody who is interested in data driven analytics.” /Contoso Marketing Plan.pdf

Note: Remember to use the front slash (/) when referencing documents. Do not add a trailing space after your / or it will cancel the file reference.

Note: Your document will inherit the sensitivity label of the source content.

Tip: M365 Copilot for Word can reference up to 3 documents. In this example, you are referencing one.

1.10. The content will generate for you. Anything highlighted in blue is not saved until you click **“Done”** at the bottom of the page.

Contoso Marketing Plan

One-page executive brief: turning analytics into market momentum

Impact statement

For anyone interested in data-driven analytics, this study is a practical example of how data becomes a growth engine: it connects market research, customer segmentation, predictive modeling, digital engagement, and budget discipline into one measurable plan for improving decisions, increasing reach, and converting insight into action.

Why it matters now

Contoso is positioned as a data-driven analytics consulting company helping organizations use information to make faster, more confident decisions. The plan shows how analytics can move beyond dashboards and reports into end-to-end business strategy: identifying the right audience, shaping the offer, focusing marketing spend, and tracking outcomes that matter.

At-a-glance strategy

Focus area	What the plan emphasizes	Viewer takeaway
Target market	Large enterprises, mid-sized companies, startups, growth businesses, and industries where analytics direct	Contoso can serve any organization with rich data and a need to convert it into advantage.
	Increase social engagement by 25%, website	The plan is measurable, not

Today

Create a one-pager of the attached file that will catch the attention of the viewer. Include an impact statement at the beginning of how this study relates to anybody who is interested in data driven analytics. [Contoso Marketing Plan](#)

Copilot
Reasoning completed in 3 steps

I created a polished one-pager from the attached Contoso Marketing Plan with:

- A strong opening impact statement tying the study to anyone interested in data-driven analytics.
- A concise executive-style summary of why the plan matters.
- An attention-grabbing strategy table covering target market, growth goals, positioning, and investment.
- A short "what will catch attention" section with viewer-focused takeaways.
- A clear bottom-line message that frames analytics as both Contoso's product and operating model.

One note: the content is currently flowing to about two pages because of the richer formatting and table layout. If you want, I can tighten it further so it fits cleanly single page.

I. Introduction

A. Contoso's Marketing Plan

the purpose of this marketing plan is to outline a comprehensive strategy that will drive the successful promotion, positioning, and growth of our company/product/service in the marketplace.

- This serves as a roadmap, providing a clear direction and set of actionable steps to achieve our marketing objectives and reach our target audience effectively.
- By developing this plan, we aim to create a cohesive and integrated approach to attract, engage, and retain customers, driving business growth and maximizing our competitive advantage.
- The scope of this plan encompasses a thorough analysis of the market landscape, identification of target markets, formulation of key strategies, and allocation of resources, ensuring a well-defined roadmap to guide our marketing efforts.
- Through the implementation of this plan, we aim to strengthen brand awareness, increase market share, and generate meaningful customer interactions, leading to increased customer loyalty and long-term profitability.

I. Introduction

A. Contoso's Marketing Plan

- The purpose of this marketing plan is to outline a comprehensive strategy that will drive awareness, lead generation, and revenue growth for Contoso as a solar panel and solar energy solutions provider.
- This plan serves as a roadmap for positioning Contoso in a competitive renewable energy market, helping residential, commercial, and community customers understand the financial, environmental, and energy-independence benefits of solar adoption.
- By developing this plan, we aim to create a cohesive approach to attract, educate, convert, and retain customers who are evaluating solar panels, battery storage, financing options, and installation services.
- The scope of this plan includes market analysis, audience segmentation, value proposition development, channel strategy, campaign execution, budget allocation, and performance measurement specific to solar panel sales and installation.
- Through implementation, Contoso aims to strengthen brand awareness, build trust in its solar expertise, increase qualified consultations, and convert more households and businesses into long-term clean-energy customers.

1.14. Select a text block and click on the copilot icon, then choose "Auto Rewrite." Copilot will provide different wording suggestions. Use the arrows to browse through the responses. You can replace your text, paste it below your selection, or regenerate it. Additionally, you can give Copilot further instructions in the “What would you like to change” box. Click the “X” to cancel and close the “Rewrite with Copilot” box.

1.15. In the Contoso Marketing Plan, navigate to the Implementation Plan section. Select all roles from “Project Manager” to “Social Media Consultant.” Click on the prompt box in Copilot on the right and type “Visualize as a Table.” The roles will then be organized in a table format.

VII. Implementation Plan

- Project Manager:**
 - Oversee the entire marketing campaign, ensuring all activities are executed effectively and on time.
 - Coordinate and manage the team members involved in the campaign.
 - Set project goals, milestones, and timelines.
 - Monitor progress, identify potential risks, and implement necessary adjustments.
 - Maintain clear communication with stakeholders and provide regular project updates.
- Consultant:**
 - Provide expert guidance and insights on data-driven analytics strategies and solutions.
 - Conduct in-depth analysis of client requirements and develop tailored consulting approaches.
 - Collaborate with the team to develop comprehensive analytics frameworks and methodologies.
 - Deliver high-quality consulting services and recommendations to clients.
 - Monitor industry trends and emerging technologies in the analytics field.
- Digital Creator:**
 - Create engaging and visually appealing digital content such as graphics, videos, and infographics.
 - Develop content for various marketing channels, including social media, website, and advertising campaigns.

- Collaborate with the marketing team to align content with the overall brand messaging and campaign objectives.
 - Ensure consistency in visual branding and adherence to brand guidelines.
 - Stay updated on design trends and best practices in digital content creation.
- Marketing Manager:**
 - Develop and execute the overall marketing strategy for Contoso.
 - Conduct market research and competitor analysis to identify target markets and key opportunities.
 - Develop and manage marketing campaigns across digital, social media, and traditional marketing channels.
 - Monitor and analyze campaign performance metrics and make data-driven decisions for optimization.
 - Collaborate with cross-functional teams, including sales, product development, and client services, to ensure alignment and achieve business objectives.
- Social Media Consultant:**
 - Develop strategies to increase brand awareness, engagement, and lead generation through social media campaigns.
 - Create and curate content for social media platforms, ensuring it aligns with the brand voice and resonates with the target audience.
 - Monitor social media, respond to customer questions, and engage with the online community.

I updated the selected introduction and company overview sections to add solar-panel company context.

What changed

- Reframed the marketing plan around Contoso as a solar panel and solar energy solutions provider.
- Added context around residential, commercial, and community customers.
- Included solar-specific value points such as energy savings, sustainability, battery storage, incentives, financing, system sizing, and installation support.
- Replaced the prior data-analytics consulting language with solar-focused positioning.

A good next step would be updating the **Target Market**, **Marketing Objectives**, and **Marketing Strategies** sections so the rest of the plan fully aligns with the solar-panel business context.

Sources

- Update target market section
- Align marketing objectives and strategies
- Add competitive analysis details

Visualize as a table

VII. Implementation Plan

Role	Responsibilities	Key Deliverables	Timeline
Project Manager	Oversee the marketing campaign, coordinate team members, set milestones, manage risks, and provide regular stakeholder updates.	Ensure launch activities align to solar sales cycles, installation capacity, incentive deadlines, and regional market priorities.	Campaign timeline, milestone tracker, risk log, stakeholder updates, and performance review cadence.
Consultant	Provide market guidance, analyze customer needs, develop tailored recommendations, and monitor industry trends.	Translate solar customer needs into segments such as homeowners, commercial property owners, and sustainability-focused organizations.	Segmentation analysis, value proposition, competitive insights, and messaging priorities.
Digital Creator	Create graphics, videos, infographics, web content, and advertising assets.	Develop visuals that explain solar savings, panel performance, battery storage, financing	Social graphics, short videos, explainer infographics, landing-page

I converted the selected Implementation Plan list into a table.

What I changed

- Replaced the role-by-role bullet list with a structured table.
- Added columns for:
 - Role
 - Primary responsibilities
 - Solar-panel company focus
 - Key outputs
- Updated the content so each role is tied specifically to solar-panel marketing, including consultation booking, installation capacity, incentives, customer education, battery storage, and solar savings messaging.

Sources

- Edit in a page
- Create table for marketing sections

Describe what you'd like to edit

AI-generated content may be incorrect

VIII. Evaluation

Role	Responsibilities	Key Deliverables	Timeline
Project Manager	aligned to campaign messaging.	options, and installation steps in simple terms.	visuals, and ad creative variations.
Marketing Manager	Develop and execute the marketing strategy, manage campaigns, analyze performance, and coordinate with sales and operations.	Connect digital demand generation with solar consultation booking, quote follow-up, customer education, and referral programs.	Channel plan, campaign calendar, lead-generation funnel, conversion reporting, and optimization recommendations.
Social Media Consultant	Build social strategy, create and curate content, respond to customer questions, and analyze engagement metrics.	Use social channels to answer common solar questions, promote installations, address cost concerns, and build local trust.	Social content plan, community engagement playbook, monthly metrics report, and lead-nurture recommendations.

Done Undo

Use Case 3: Analyzing and summarizing a document with Copilot in Word

1.15. Open the Contoso Marking Plan document. A summary has been added above it by Copilot to provide context. You have the option to “Copy” or choose one of the suggestion cards: “Show me a detailed summary,” “What are the key takeaways?”, “Ask a Question about this doc.”

Summary

Contoso's marketing plan outlines a comprehensive strategy to grow its data-driven analytics consulting business by targeting diverse industries and enhancing brand presence. The plan emphasizes leveraging digital marketing, social media, and expert team capabilities to attract and retain clients effectively.

- Bullet highlights **\$200,000 budget** allocated across key roles including project management, consulting, and digital creation.
- Bullet details **SMART marketing objectives** such as increasing social media engagement by 25% and website traffic by 30%.
- Bullet covers deliverables like a **campaign plan, digital assets, and social media growth strategy**, with clear ownership and acceptance criteria.

AI-generated content may be incorrect

1.13. Selecting “Show me a detailed summary” will display the summary in the Copilot sidebar, where users can request further clarification or specific details about the document. Copilot in Word will generate a response and provide references to where the information was obtained. Users can also refine the responses for tone, clarity and format. Prompt in Copilot or select some of the suggested ones:

“Specify key deliverables and deadlines”

“Clarify primary target market segments”

I. Introduction
A. Contoso's Marketing Plan

- The purpose of this marketing plan is to outline a comprehensive strategy that will drive awareness, lead generation, and revenue growth for Contoso as a solar panel and solar energy solutions provider.
- This plan serves as a roadmap for positioning Contoso in a competitive renewable energy market, helping residential, commercial, and community customers understand the financial, environmental, and energy-independence benefits of solar adoption.
- By developing this plan, we aim to create a cohesive approach to attract, educate, convert, and retain customers who are evaluating solar panels, battery storage, financing options, and installation services.
- The scope of this plan includes market analysis, audience segmentation, value proposition development, channel strategy, campaign execution, budget allocation, and performance measurement specific to solar panel sales and installation.
- Through implementation, Contoso aims to strengthen brand awareness, build trust in its solar expertise, increase qualified consultations, and convert more households and businesses into long-term clean-energy customers.

Today

Provide a detailed summary of this document. Don't walk through the document section by section, instead, synthesize the content into the most important themes, decisions, and takeaways. Group related points together even if they appear in different parts of the document. Be specific and reference concrete details, but keep the summary readable and substantially shorter than the original document. If there are open questions or unresolved issues explicitly mentioned in the doc, call those out at the end.

 **Copilot**

The document is a marketing plan for Contoso, but its core positioning is inconsistent: parts describe Contoso as a **solar panel and solar energy solutions provider**, while other sections frame it as a **data-driven analytics consulting company**. The strongest through-line is that the plan is meant to define how Contoso will raise awareness, generate leads, convert prospects, and manage marketing execution within a defined budget and team structure.

A major theme is **customer education and trust-building**. In the solar-focused portions, Contoso is positioned as a company that helps customers understand solar adoption through transparent proposals, energy usage assessments, financing and incentive guidance, system sizing, installation coordination, optional battery storage, and post-installation performance support. The plan emphasizes reducing electricity costs, increasing energy independence, and helping homeowners, commercial property

Microsoft 365 Copilot: Copilot in PowerPoint

Required Documents:

1. Contoso Marketing Plan.pdf

Copilot in PowerPoint: Introduction

M365 Copilot in PowerPoint will take your document and turn it into professional presentations. M365 Copilot in PowerPoint will work alongside you to create, edit, and understand information in a PowerPoint presentation. Copilot in PowerPoint will create a deck from scratch for users and summarize long presentations. Users can also use Copilot to restructure your slides for better coherency. All of this can be done with an organization's template and branding.

Copilot in PowerPoint Use Cases

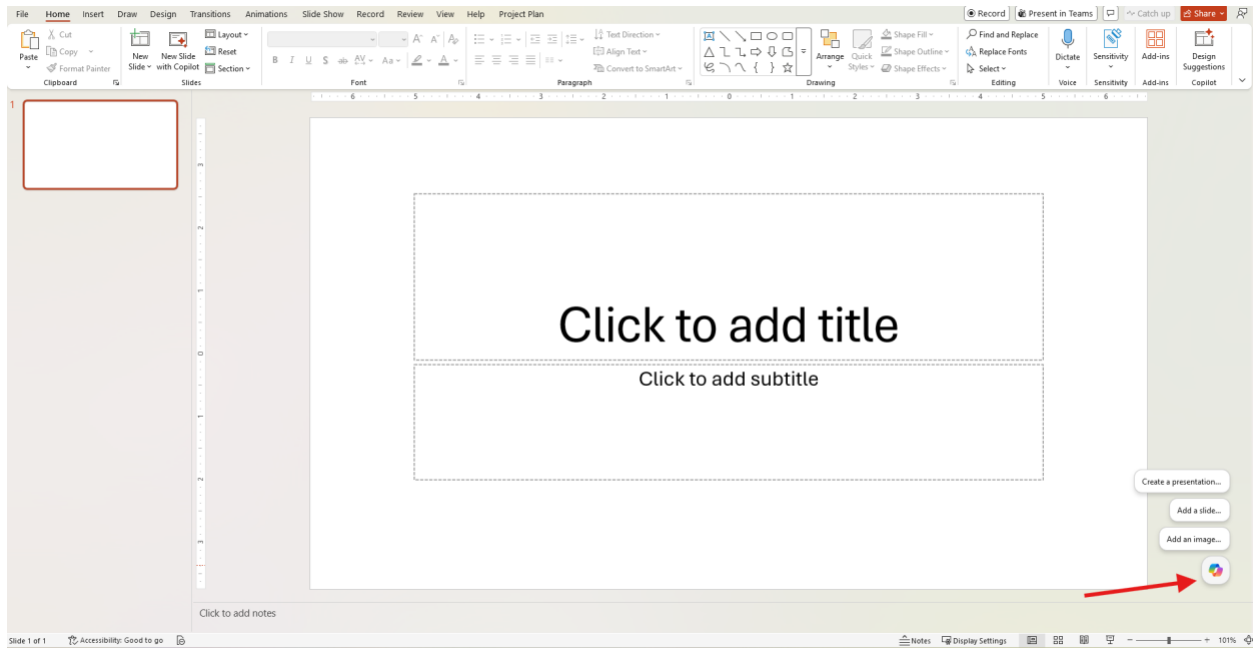

As a leader in data analytics, you want to proactively research emerging trends and implications for your consulting firm. "Contoso Marketing Plan.pdf." This is in PDF format, and you would like to create a PowerPoint presentation for it. You will reference the PDF and use Copilot in PowerPoint to create the presentation for you. (This document is the same research paper referenced in the Copilot for Word section.)

As a leader or key contributor at a data analytics consulting firm, it is vital to keep the company informed about emerging trends that can be leveraged to enhance revenue and employee satisfaction. To achieve this, you need to develop an engaging and informative PowerPoint presentation aimed at securing funding or additional time to pursue these opportunities. You may find yourself struggling with the initial draft of this presentation, seeking assistance from Copilot in PowerPoint to ensure your message is clear and impactful.

Use Case 1: Create a PowerPoint from a PDF document

2.1. Review “Contoso Marketing Plan.pdf” PDF document.

2.2. Open a blank PowerPoint presentation. Users can interact with M365 Copilot in both the desktop application and browser. They can also start with their organization’s branding/template. You will have the ability to create a presentation directly from the Copilot icon in the bottom right corner.

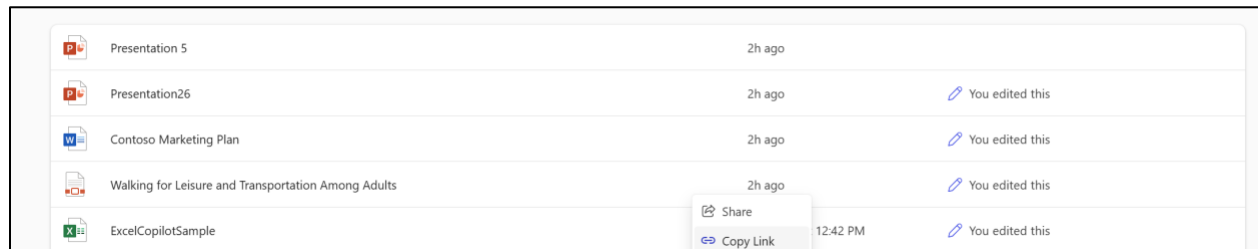

2.3. Prompt M365 Copilot for PowerPoint:

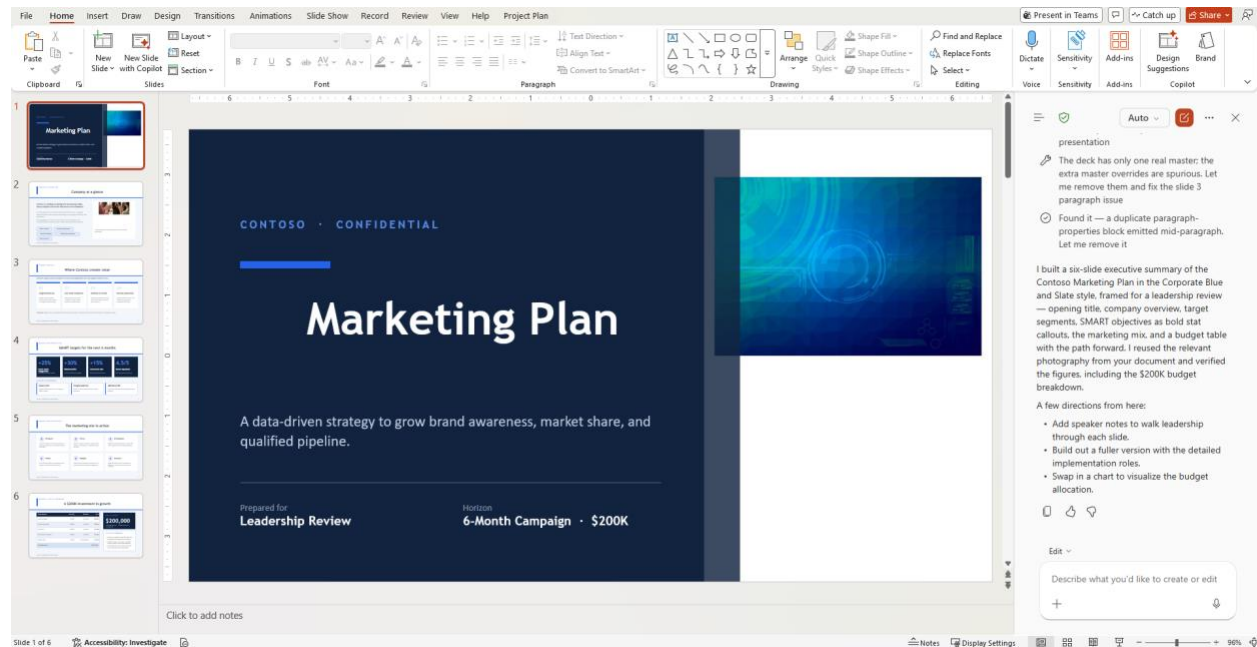

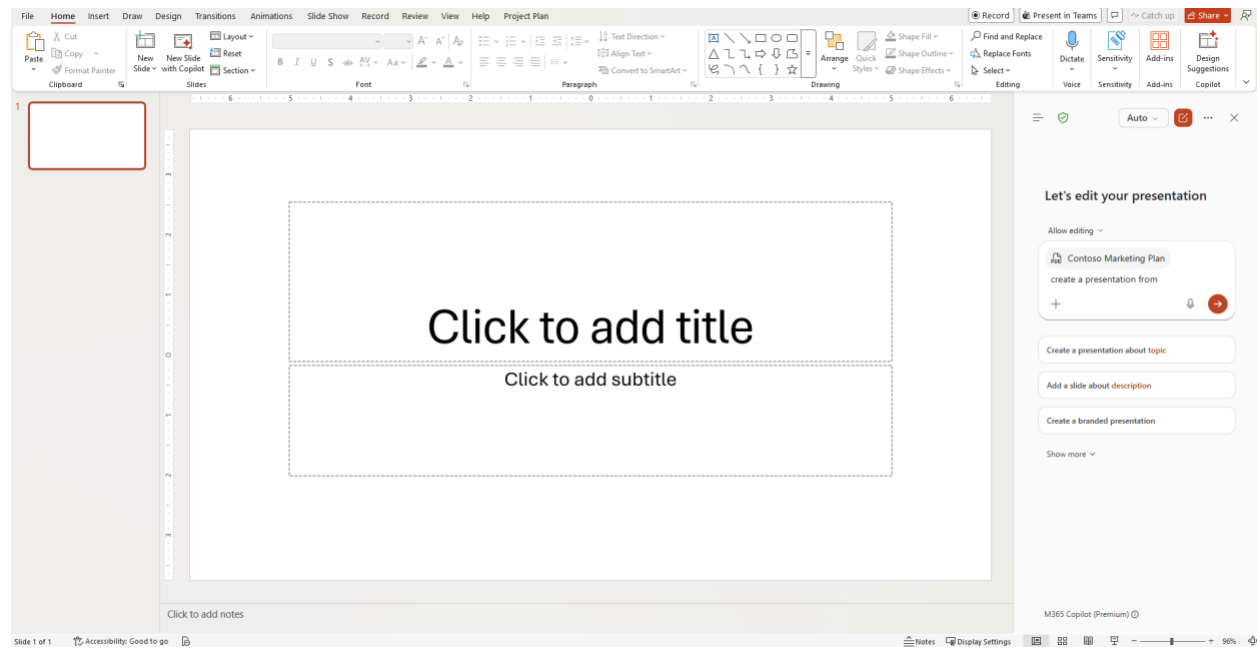

“Create a presentation from /Contoso Marketing Plan.pdf”

You can also reference this PDF by inserting the Share Link into the prompt.

“Create a Presentation from [Share Link]”

Tip: M365 Copilot for PowerPoint can reference one document. This includes PDF file types as well.

The new slide deck will contain the following:

- Images and visualizations to make your deck more engaging
- Applied layout to organize the slide
- If applicable, the sensitivity label from the source content.

Use Case 2: Create a PowerPoint without a reference document

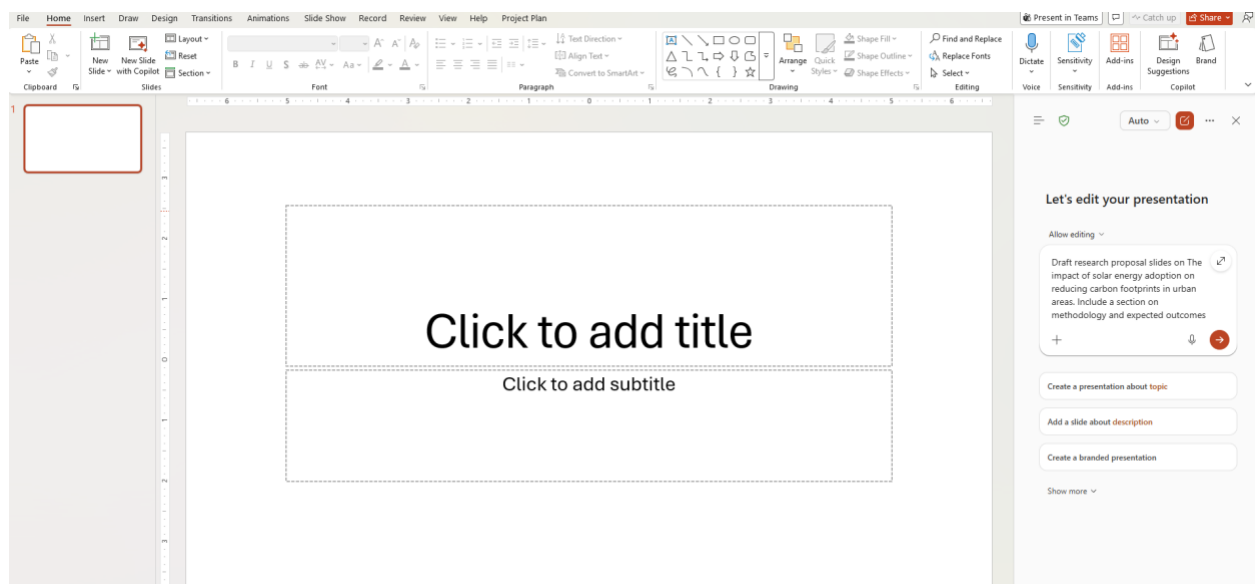

2.4. Now that our deck is complete, users will move on to the next deck that needs to be created this week. Start by opening a blank PowerPoint presentation. Then open the Copilot in PowerPoint sidebar.

Prompt for Copilot in PowerPoint:

“Draft research proposal slides on [any of the topics]. Include a section on methodology and expected outcomes.”

Example research topics:

- *The impact of solar energy adoption on reducing carbon footprints in urban areas*
- *Comparative analysis of solar panel efficiency in different climatic conditions*
- *Innovations in solar battery storage technology*
- *The economic viability of renewable energy investments for small and medium-sized enterprises*
- *The role of government policies in promoting renewable energy sources*
- *Sustainable development through the integration of solar energy in rural electrification*

2.5. M365 Copilot in PowerPoint quickly creates a deck from the user's prompt. Expect unique design elements, fonts, and colors. Review slides and confirm content. The new draft slides will include:

- Images to make your deck more engaging
- Applied layout to organize the slide
- If applicable, your organization's general sensitivity label

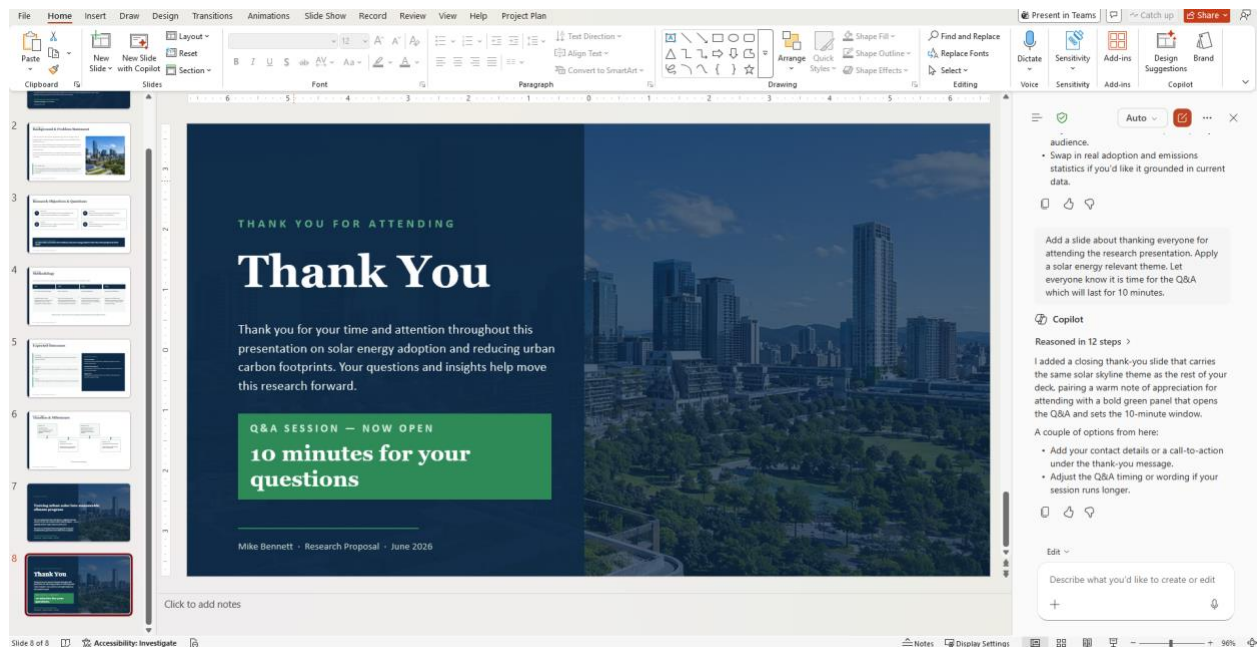

Use Case 3: Edit/Add Slides with M365 Copilot in PowerPoint

2.6. Navigate to the end of the newly created research presentation. Select the last slide in the deck. Click on “New Slide with Copilot” at the top in the ribbon.

Prompt for Copilot in PowerPoint:

“thanking everyone for attending the research presentation. Apply a solar energy relevant theme. Let everyone know it is time for the Q&A which will last for 10 minutes.”

Copilot in PowerPoint will create a new slide (or edit an existing slide) at the end of the deck.

Review the content. Encourage users to drop in on the chat what Copilot in PowerPoint created for them. Design/Imagery may be different between users. This behavior is expected.

Use Case 4: Organizing PowerPoint and Applying Transitions

Let's continue to use the existing deck we've created. But, now we're going to organize it and apply transitions.

2.7. Prompt for Copilot in PowerPoint:

“Organize this presentation.”

Copilot will prompt users on what they want included as part of the organization. User can select options by checking the box next to the selection. Multiple selections can be made.

The Impact of Solar Energy Adoption on Reducing Carbon Footprints in Urban Areas

A mixed-methods study examining how rooftop and community solar deployment lowers per-capita greenhouse gas emissions across dense urban environments.

The Impact of Solar Energy Adoption on Reducing Carbon Footprints in Urban Areas

A mixed-methods study examining how rooftop and community solar deployment lowers per-capita greenhouse gas emissions across dense urban environments.

Principal Investigator: Cora Thomas
Submitted June 2026

Copilot

Reasoned in 3 steps

What does "organize" mean for this deck? The slides already follow a logical flow, so what would help most?

- ☒ **Add agenda + sections**
Insert a table-of-contents/agenda slide and group slides into labeled sections for clearer navigation.
- ☒ **Reorder slides**
Rearrange the sequence into the most logical narrative order.
- ☒ **Tidy & standardize**
Align headers, footers, and formatting for visual consistency across all slides.
- ☐ **Condense / merge**
Combine overlapping slides and trim redundancy for a tighter deck.
- ☐ Enter another option

Confirm **Skip all**

Edit

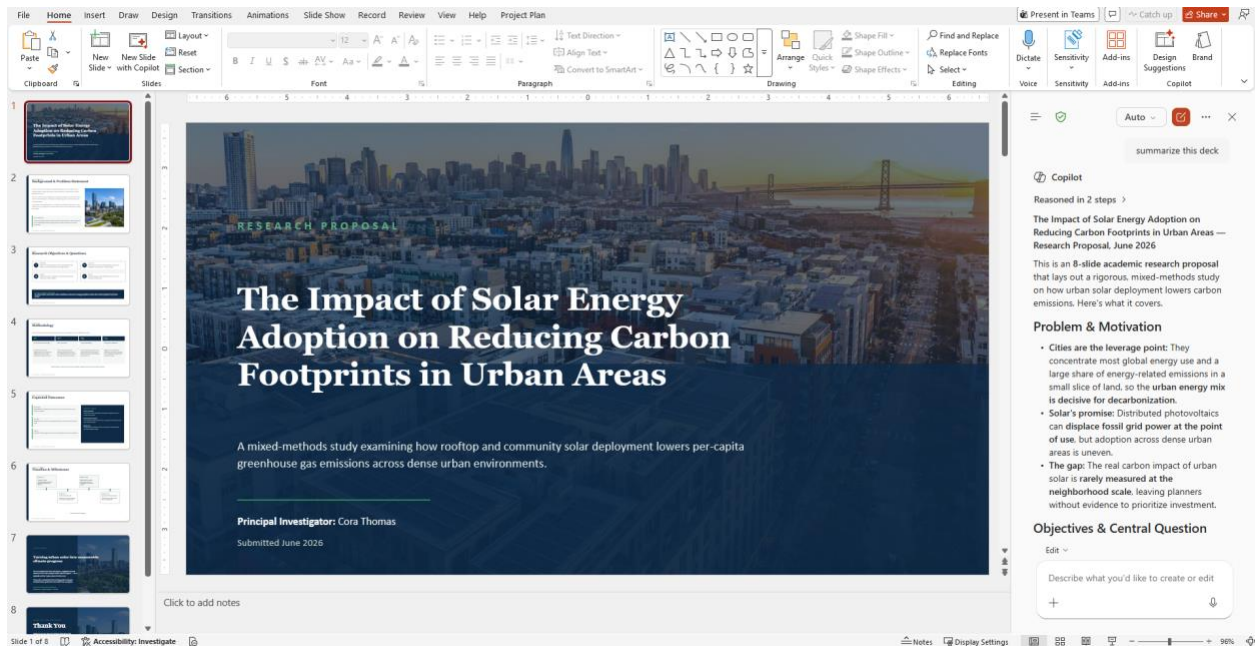

Describe what you'd like to create or edit

Use Case 5: Summarizing the PowerPoint and Comprehending Content

2.8. Prompt for Copilot in PowerPoint:

“Summarize this deck.”

Copilot in PowerPoint will summarize the deck for the user.

Microsoft 365 Copilot – Copilot in Excel

Required Documents:

1. SampleEnergySalesCopilot.xlsx

Copilot in Excel: Introduction

Copilot in Excel helps you do more with your data in Excel tables by generating formula column suggestions, showing insights in charts and PivotTables, and highlighting interesting portions of data. Copilot in Excel can show insights based on your data or a specific question you ask about your data. With Copilot in Excel, it is easy to highlight, sort, and filter your tables to quickly call attention to what matters to the users. Copilot in Excel can also help with writing a formula for a new column.

Copilot in Excel Use Cases

Assume you are a Renewable Energy Sales Representative. You have a large excel sheet (SampleEnergySalesData.xlsx) with valuable information from your work, such as Energy segment Price and Discount Band. With the help of Copilot in Excel, reasoning over your large data set will be a breeze. Additionally, you will use Copilot in Excel to create a new Profit Margin column/formula, which will surface valuable insights as you continue your work.

Use Case 1: Understanding your data in an Excel sheet.

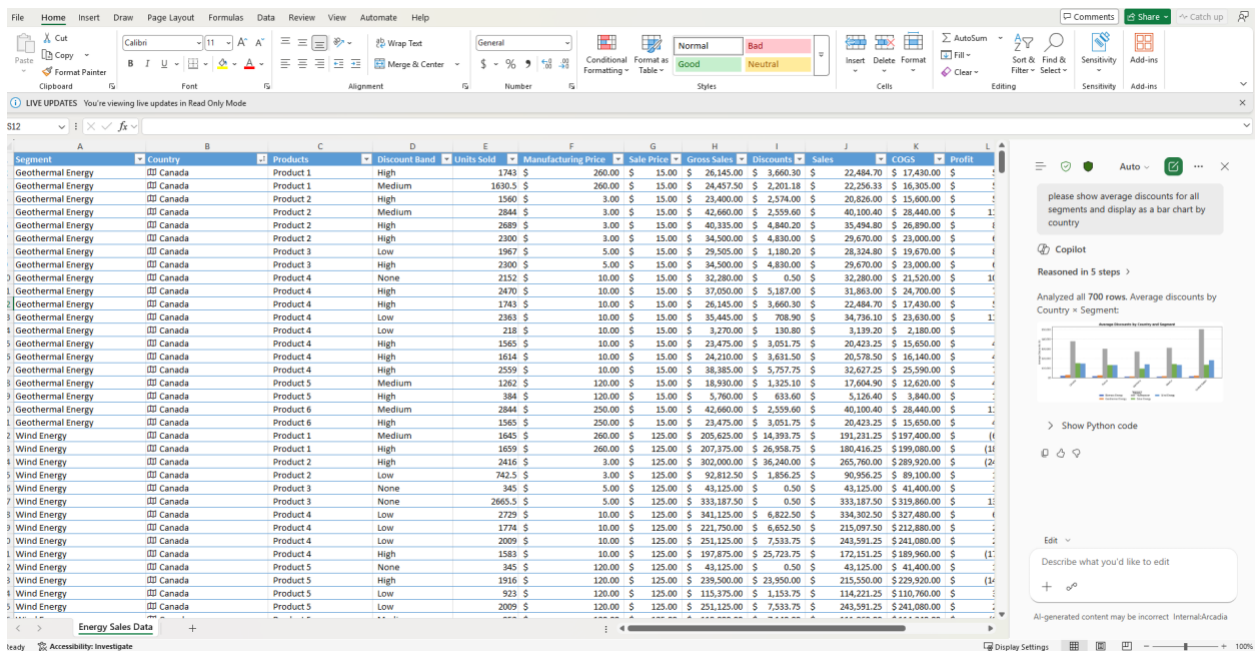

3.1. Review the sample Excel sheet. This sheet includes data on manufacturing industry sales, with fields such sales, discounts, units sold, and profit.

Segment	Country	Products	Discount Band	Units Sold	Manufacturing Price	Sale Price	Gross Sales	Discounts	Sales	COGS	Profit	Month Number	Month Name	Year
Geothermal Energy	Canada	Product 1	High	1743	\$ 260.00	\$ 15.00	\$ 26,145.00	\$ 3,660.30	\$ 22,484.70	\$ 17,430.00	\$ 5,054.70	10	October	2022
Geothermal Energy	Canada	Product 1	Medium	1690	\$ 260.00	\$ 15.00	\$ 24,437.50	\$ 2,201.18	\$ 22,236.33	\$ 16,305.00	\$ 5,931.33	7	July	2023

3.2. Click on the Copilot in Excel button at the bottom right of the screen.

Prompt for Copilot in Excel:

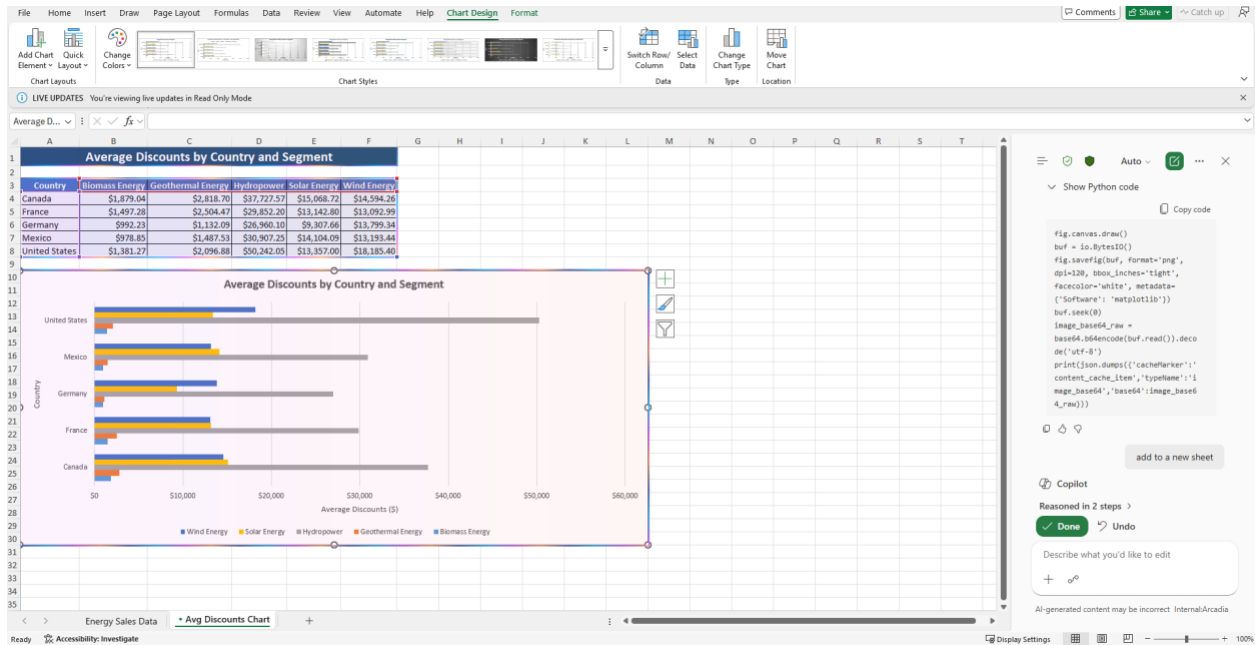

“Please show average discounts for all segments and display as a bar chart by country”

3.4. Copilot in Excel analyzes the data in this sheet and provides insights, data breakdown and a bar chart. *Note: While the content provided by Copilot in Excel may be worded differently between users, the facts and figures will be the same.*

3.5. Type **“Add to a new sheet”** in the Copilot prompt box and hit enter. The new table will be added and named **“Avg Discounts Chart”**.

Note: You'll have to remember to click the “Done” or “Undo” buttons.

Use Case 2: Normalizing data with Copilot in Excel

3.6. You'll notice that the date data in the table is supplied as separate columns (Month Number, Month Name and Year) as opposed to a column with a “Date” type. If you wish to create formulas or analyze trend data – or if you wish to ask Copilot to do so, it would probably be easier if you had a Date type column to reference.

3.7. Go back to the “Energy Sales Data” tab and enter the following prompt into Copilot:

Prompt for Copilot in Excel:

“Add a date column after year in mm/yyyy format using the month number and year.”

The screenshot shows the Microsoft Excel interface with a Copilot sidebar on the right. The Copilot prompt is: "Add a date column after year in mm/yyyy format using the month number and year." The sidebar shows the prompt, a "Reasoned in 2 steps" status, and a "Done" button. The Excel spreadsheet displays a table with columns for Product, Discount Band, Units Sold, Manufacturing Price, Sale Price, Gross Sales, Discounts, Sales, COGS, Profit, Month Number, and Month Name. The "Month Name" column is highlighted in blue, indicating it was created by Copilot.

3.9. Copilot in Excel creates the formula for the new column using the format you specified.

Notice, that you'll have to choose to either keep the column by clicking on "Done" or delete it by clicking on "Undo".

3.10. Click on **“Done”** and the new column will be inserted in the location you requested.

Use Case 1.2: Create a new formula with Copilot in Excel Part 1

Let's continue to work with the spreadsheet. This time lets calculate a new column.

3.11. Prompt for Copilot in Excel:

“Add a column that calculates the profit margin based on COGs, Sale Price, and Discounts.”

3.12. Copilot in Excel will create a "Profit Margin" column, displaying both a natural language description of the formula and the Excel syntax for "Profit Margin".

The screenshot displays the Microsoft Excel interface with a financial data table. The table has columns for Products, Discount Band, Units Sold, Manufacturing Price, Sale Price, Gross Sales, Discounts, Sales, COGS, Profit, Month Number, Month Name, Year, Date, and Profit Margin. The data is organized by product and discount band, showing various financial metrics over time.

On the right side of the Excel window, the Copilot sidebar is visible, providing suggestions and actions:

- Auto** (selected)
- Reasoned in 1 step**
- Added Profit Margin in Energy Sales Data (Q1/Q2)**
- Formula uses net sales after discounts:**
$$\frac{(\text{Net Sales} - \text{COGS})}{\text{Net Sales}}$$
- Done** and **Undo** buttons
- Describe what you'd like to edit** (with a plus icon)
- AI-generated content may be incorrect. InternalArcadia**

Use Case 2: Editing Visuals and Formatting of data in Excel

3.15. Prompt for Copilot in Excel:

“Create a data bar conditional formatting rule with gradient blue on financials body”

3.16. Copilot in Excel will create a data bar conditional formatting rule with gradient blue on financials body. You will see the preview of the data bars and you can apply the change. You can reverse the change by clicking “Undo” and copilot will reverse the change.

Microsoft Excel interface showing the 'Energy Sales Data' table. The table includes columns for Units Sold, Manufacturing Price, Sale Price, Gross Sales, Discounts, Sales, COGS, Profit, Month Number, Month Name, Year, Date, and Profit Margin. The data is organized by month and year, showing sales and profit trends. A Copilot sidebar is visible on the right, providing assistance and insights.

Use Case 3: Understand your data with Copilot in Microsoft Excel

3.17. Copilot in Excel can help users gain insights on your data.

Prompt for Copilot in Excel:

“Which profit margins are the least based on the country, products, and discount bands?”

3.18. Copilot in Excel will create a table that compares “**Profit Margin' by 'Country', 'Products', and 'Discount Band.'**” A natural language description of this insight is also provided. Copilot will add this data automatically to a new worksheet. You will have the decision choose “done” or “undo” to keep or discard it.

The screenshot shows the Microsoft Excel interface. The main worksheet displays a table titled "Lowest Profit Margins by Country, Product, and Discount Band". The table has columns for Rank, Country, Product, Discount Band, Average Profit Margin, Lowest Row Margin, and Records. The data is grouped by average profit margin, showing the lowest observed margin and record count. The Copilot sidebar on the right provides a natural language description of the data, stating: "Which profit margins are the least based on the country, products, and discount bands?" and "Created Lowest Profit Margins. Lowest average profit margins: 1. Canada — Product 5 — None: 4.0% 2. France — Product 5 — None: 4.0% 3. United States — Product 5 — None: 4.0% 4. Mexico — Product 2 — High: 9.9% 5. Canada — Product 5 — High: 11.2%". It also includes a note: "Assumed 'least' means lowest average profit margin by Country + Product + Discount Band."

Rank	Country	Product	Discount Band	Average Profit Margin	Lowest Row Margin	Records
1	Canada	Product 5	None	4.0%	4.0%	1
2	France	Product 5	None	4.0%	4.0%	1
3	United States	Product 5	None	4.0%	4.0%	1
4	Mexico	Product 2	High	9.9%	-11.6%	6
5	Canada	Product 5	High	11.2%	-6.7%	5
6	Germany	Product 2	High	11.3%	-12.9%	7
7	Mexico	Product 1	Low	12.5%	0.0%	3
8	France	Product 2	High	12.9%	-12.9%	7
9	France	Product 3	High	13.4%	5.3%	4
10	United States	Product 3	High	15.0%	-6.7%	7
11	Germany	Product 3	Low	15.4%	1.0%	5
12	Germany	Product 1	Low	16.0%	2.0%	4
13	United States	Product 6	Low	16.0%	3.0%	4
14	Germany	Product 1	None	16.3%	4.0%	2
15	United States	Product 5	High	16.3%	-12.9%	9

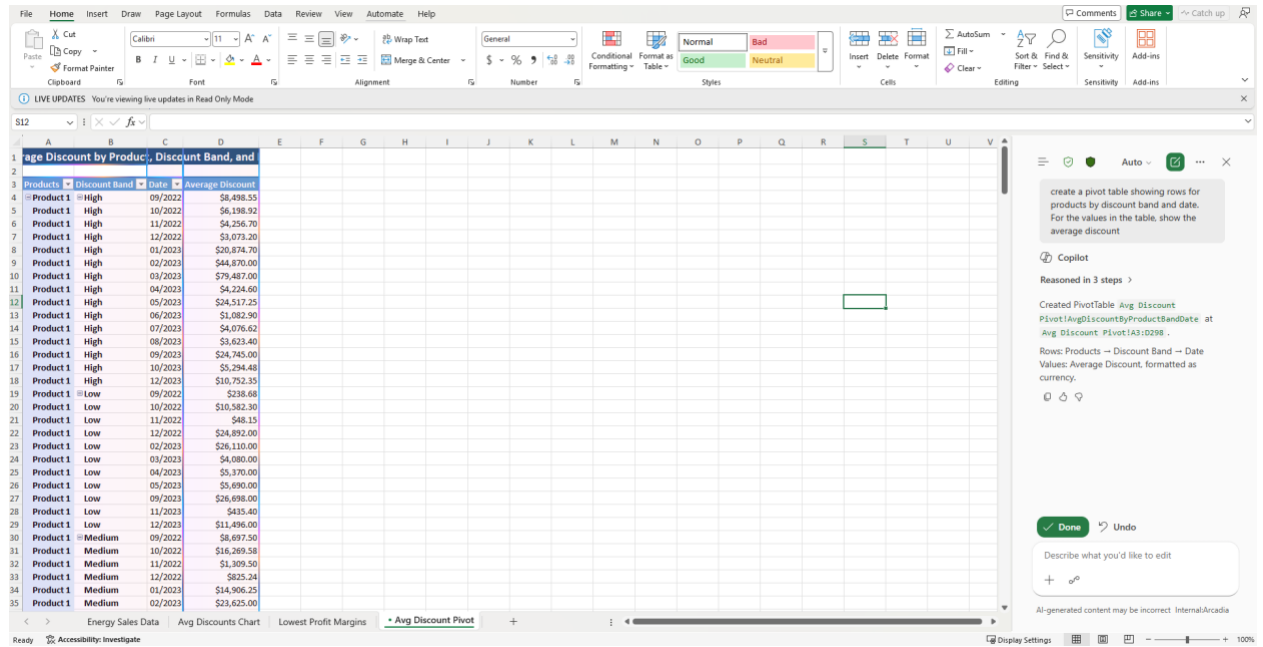

Use Case 3: Analyze your data with Copilot in Microsoft Excel

3.20. Copilot in Excel can help users gain insights on your data by helping users with creating Pivot Tables

Prompt for Copilot in Excel:

“ Create a pivot table showing rows for products by discount band and date. For the values in the table, show the average discount”

3.21. Copilot in Excel will create table that shows the average discount by Product and Discount Band. A natural language description of this insight is also provided. The table will automatically be placed in a separate worksheet.

Microsoft 365 Copilot: Copilot in Outlook

Document Requirements:

Re_ Brainstorming for Grand Opening at New Office Location.eml

Copilot in Outlook: Introduction

Save time preparing for emails with Copilot in Outlook as your drafting partner. Use Copilot in Outlook to transform long email conversations into short summaries. Users will catch up, prepare and follow-up with ease. In this portion of the experience users will be drafting their own emails and then using Coaching with Copilot to edit it. They will then summarize an email thread in their inbox.

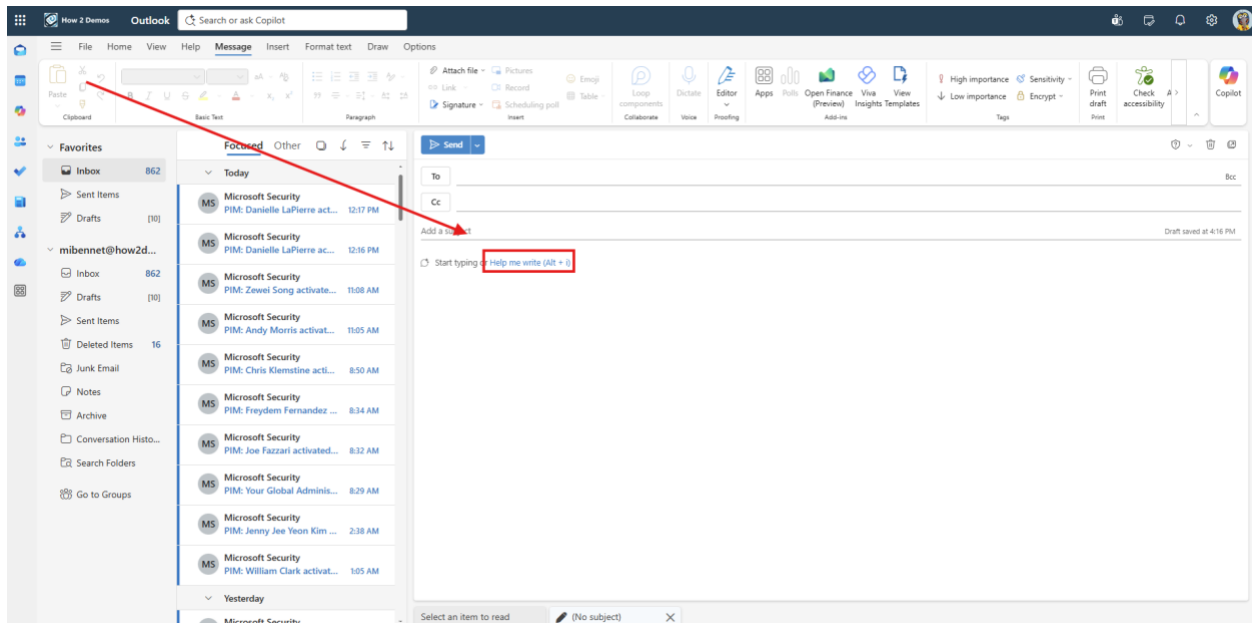

Copilot in Outlook Use Cases

In the grand opening event email thread added to your Outlook, there is a discussion among your teammates about strategies and collaboration for the upcoming event. Using Copilot, you can summarize the email thread. You may also use the draft feature with Copilot to organize your thoughts about the marketing campaign. By using the Schedule feature with Copilot, you can arrange a meeting to discuss the topic. Additionally, you can utilize the Chat with Copilot feature in Outlook to explore this topic further or manage your inbox.

Use case 1: Drafting a new email with Copilot in Outlook

4.1. Go to Outlook on the web from <https://outlook.office.com/mail/>

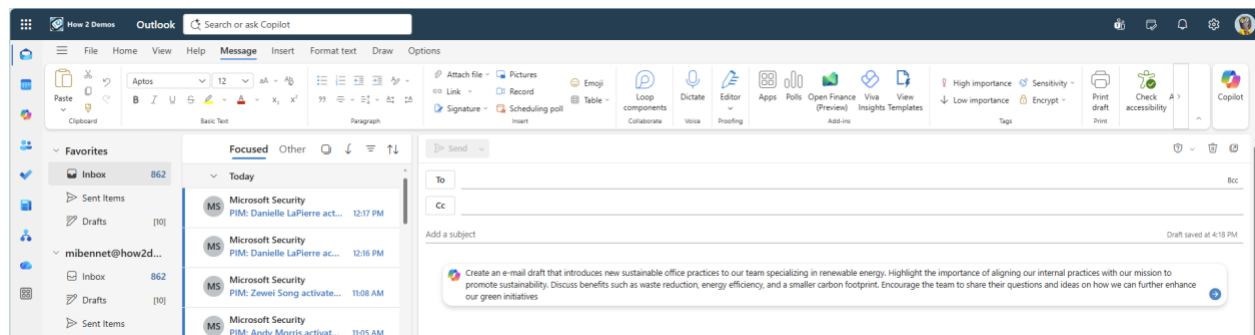

4.2. Create a new e-mail draft. In the Message click on “New”. Once the blank email draft has opened, click on “Help me write (Alt + i)” in body of the email.

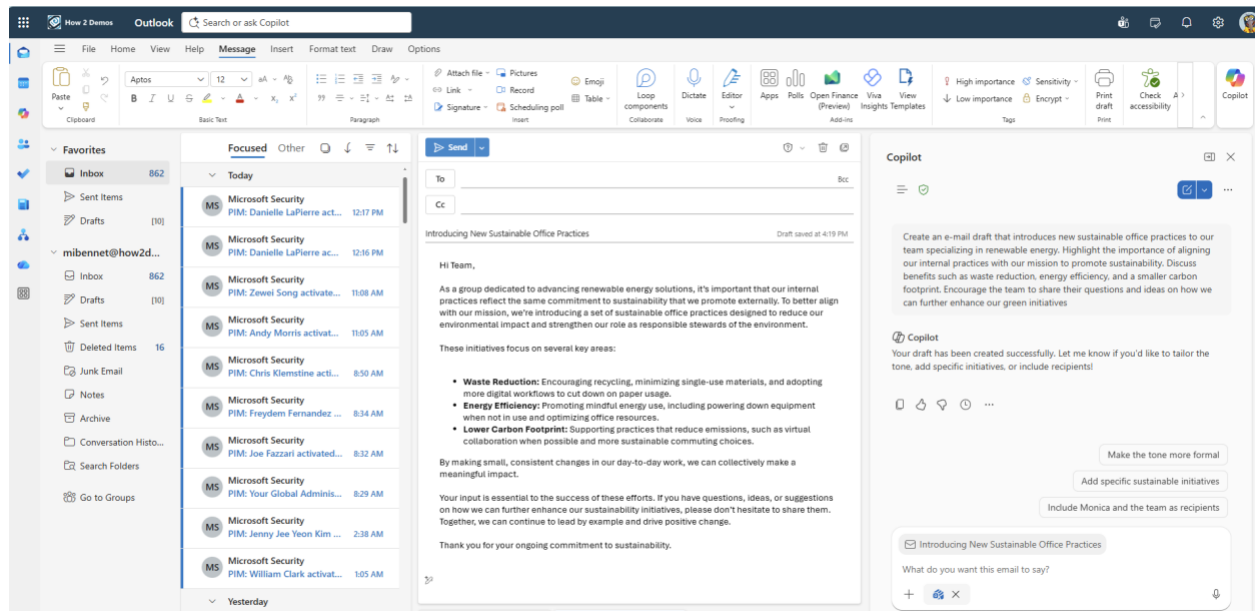

4.3. Prompt Copilot:

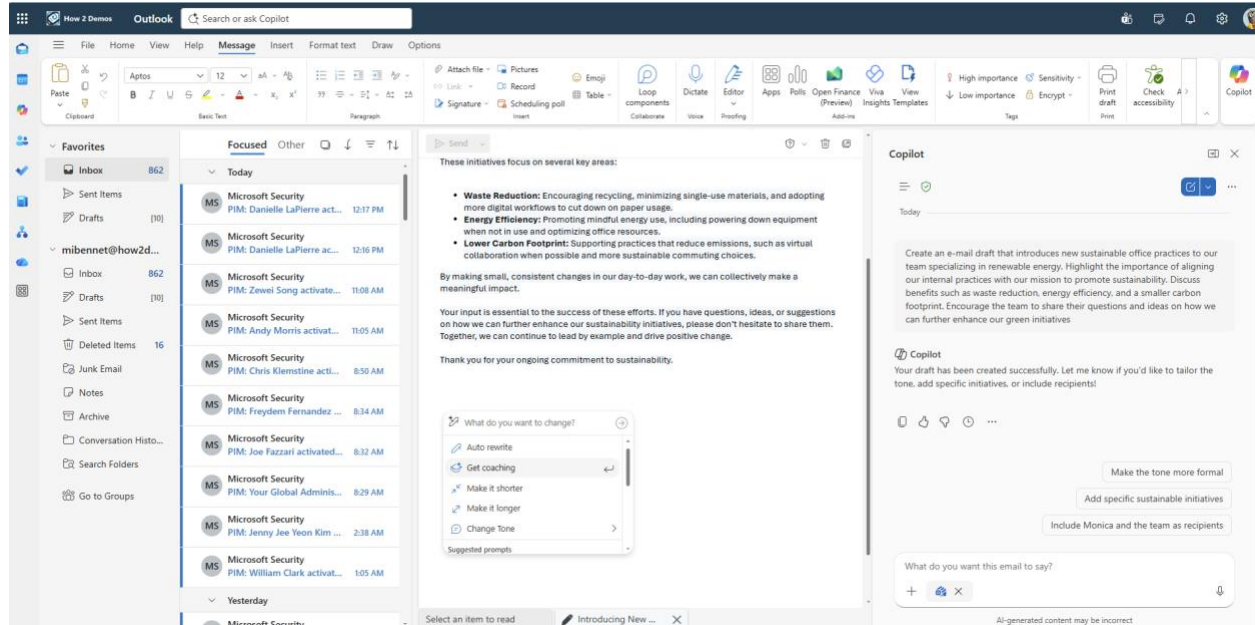

“Create an e-mail draft that introduces new sustainable office practices to our team specializing in renewable energy. Highlight the importance of aligning our internal practices with our mission to promote sustainability. Discuss benefits such as waste reduction, energy efficiency, and a smaller carbon footprint. Encourage the team to share their questions and ideas on how we can further enhance our green initiatives.”

4.4. Copilot will open in right sidebar. The draft is created for the user and is ready for editing by the user.

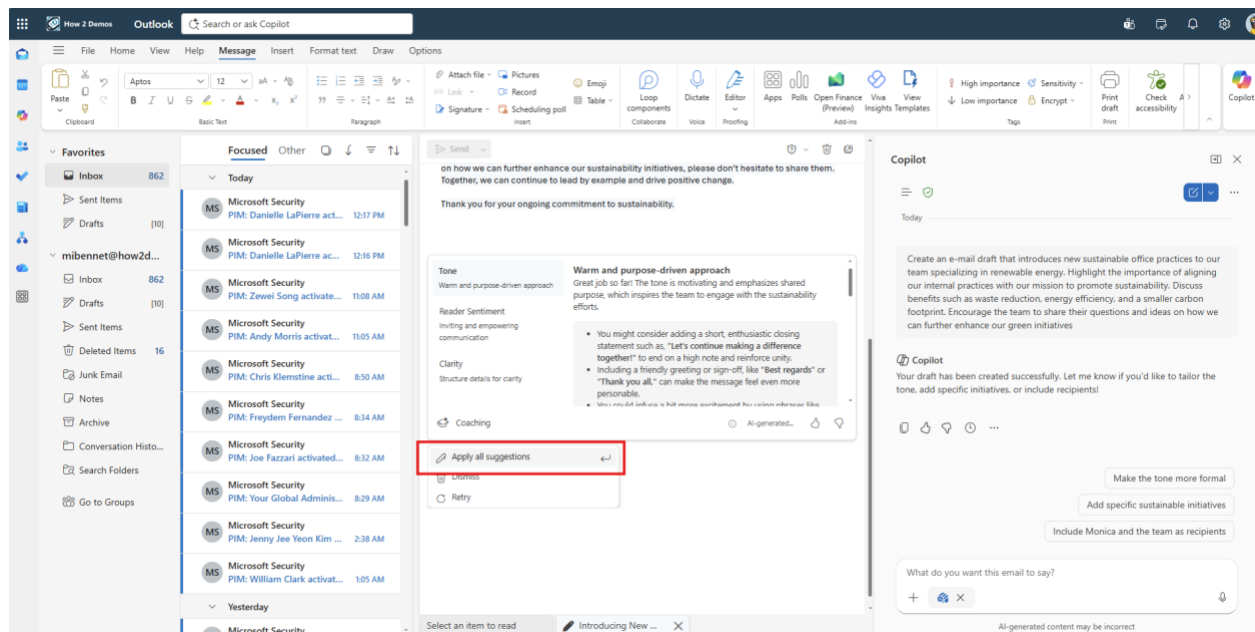

4.5. Now that the content is in your e-mail draft, you can use Coaching by Copilot to fine-tune the draft before sending it out. Coaching by Copilot works with non-Copilot generated content as well. Click on the magic pencil icon at the bottom of the newly drafted email. Select “Get Coaching” from the drop down menu.

4.7. Using the content of the e-mail draft at hand, your coach will give you suggestions on how to improve your e-mail before you send it out.

Note: At the time of writing, “Apply all suggestions” is rolling out.

4.8. Coaching by Copilot will not automatically edit any content for you. Review the suggestions and make changes as needed or click **“Apply all suggestions.”**

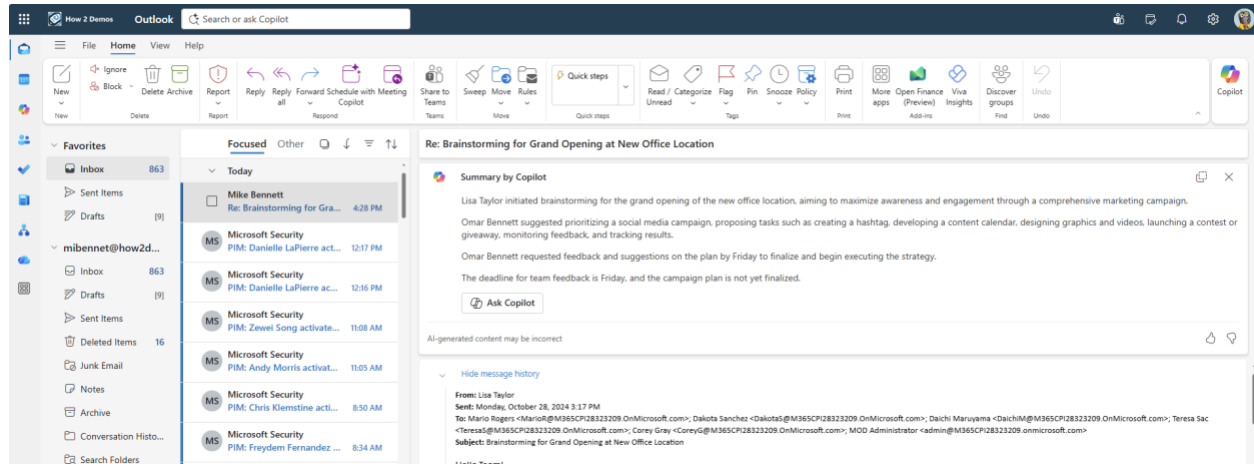

4.9. Now that you have reviewed and edited your email, you are ready to send it.

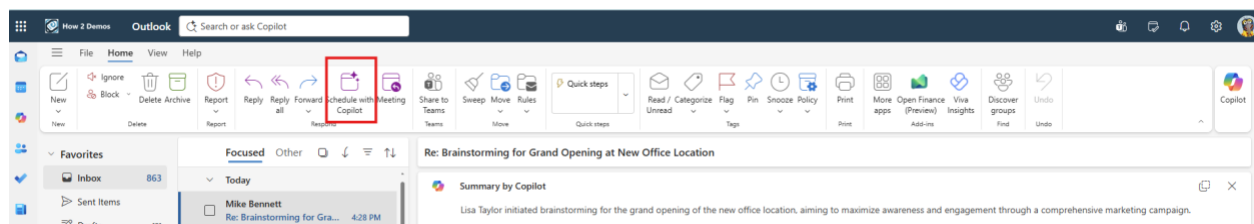

Use Case 2: Summary with Copilot in Outlook

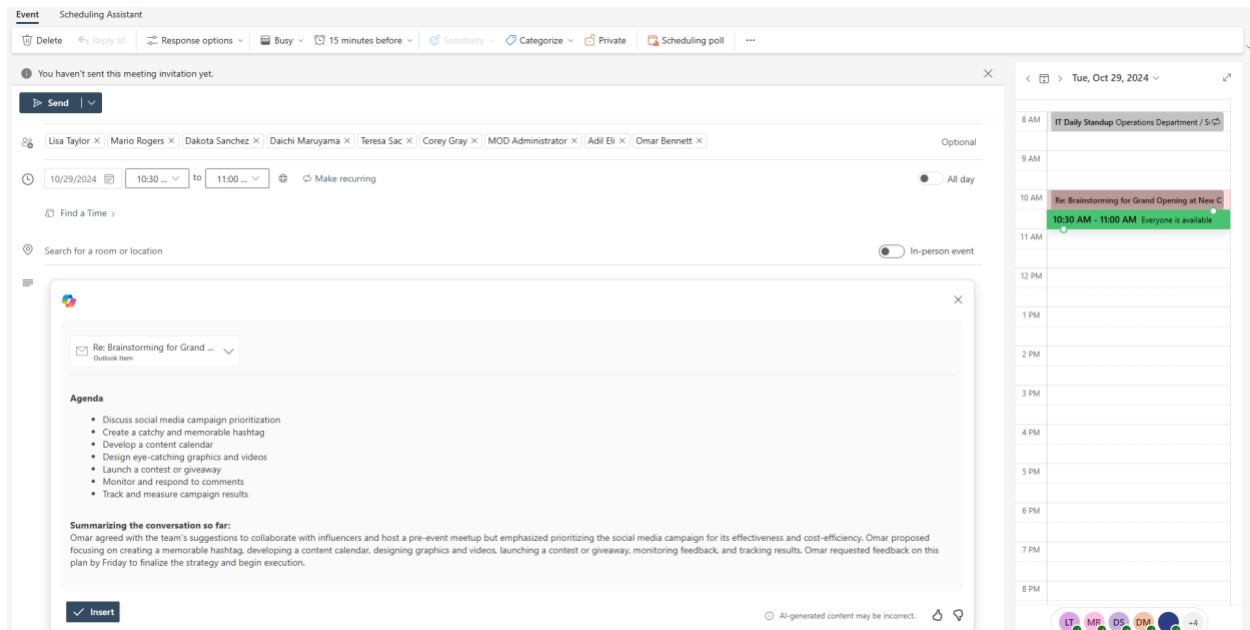

4.10. Go to <https://outlook.office.com/mail/> and click on the “Brainstorming for Grand Opening at New Office Location” email

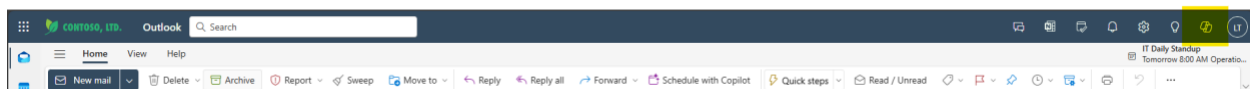

4.12. Click on “**Summary by Copilot**” that is below the title of the e-mail. Copilot in Outlook will create a summary of the key points in the email thread.

4.13. **Schedule with Copilot in Outlook.** Click “Schedule with Copilot” in the menu bar to set up a meeting using the same email thread. Copilot can interpret your meeting title, suggest relevant people, files, and times, and draft an agenda. You can then fine-tune and send the meeting or close it by clicking the “x”.

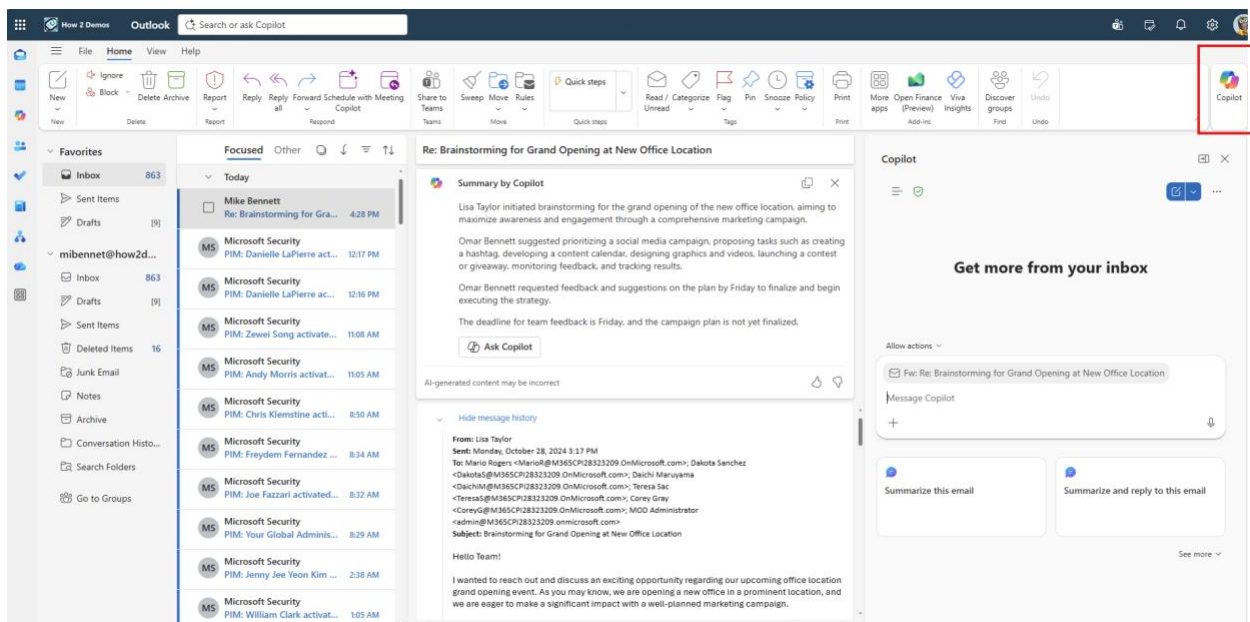

4.14. Next, we will explore **Chat with Copilot in Outlook** located in the top right toolbar.

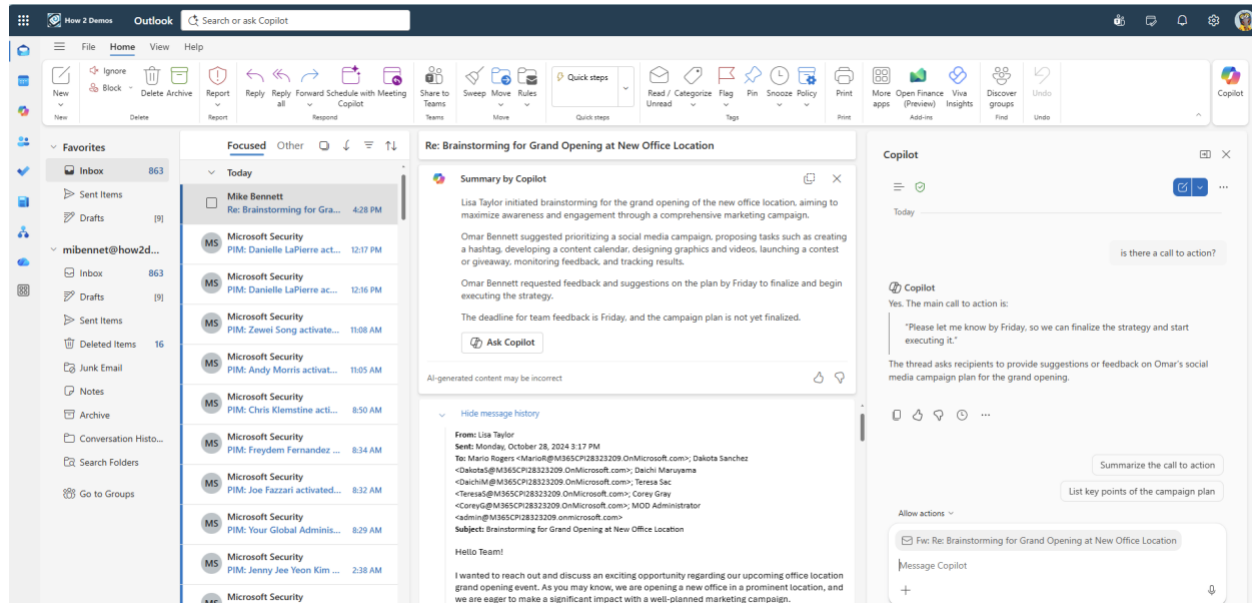

4.15. Copilot in Outlook is integrated into the app, providing users with contextual information and enabling actions within Outlook alongside chat. It allows discussions involving organizational data, web information, and email-related questions, facilitating direct actions within the platform. Copilot also offers suggestions and prompts that can be utilized.

4.16. In the same Email thread that you just summarized, Prompt Copilot:

“Is there a call to action?”

4.17. Try any of the prompts below as well as some of the ones that Copilot has suggested.

- ***“Do I have any action items in my unread emails today?”***
- ***“Create an inbox rule that says any email from sender is organized to the blue category.”***
- ***“Can you provide more details about the grand opening event?”***

Microsoft 365 Copilot: Copilot in Teams

Required Documents:

Before delivering this session, the presenter must record the Project Falcon Teams meeting.

This recording will take no more than 5 minutes to record. You will need a second participant for this recording. The script is provided for you. **The prompts used below are specific to this script.**

Copilot in Teams: Introduction

Copilot in Teams works with the words spoken in a meeting (either through the transcript or the recording). Users can take their meetings to the next level by prompting Copilot in Teams to summarize meetings and create action items. Use natural language to ask Copilot in Teams questions regarding the topic discussed during a meeting.

Copilot in Teams Meetings is unique compared to the other Microsoft Copilots that are discussed in this experience. Copilot in Teams is a powerful tool that can help you streamline your workflow and improve your productivity. It allows you to quickly find information, communicate with colleagues, and collaborate on projects. With Copilot in Teams, you can easily keep track of conversations, share files, and stay up to date with the latest developments. By integrating Copilot in Teams into your daily routine, you can save time and work more efficiently.

Copilot in Teams Use Cases

Assume you were in the Manufacturing Teams meeting (as specified under “Required Documents.”) This meeting was recorded or transcribed.

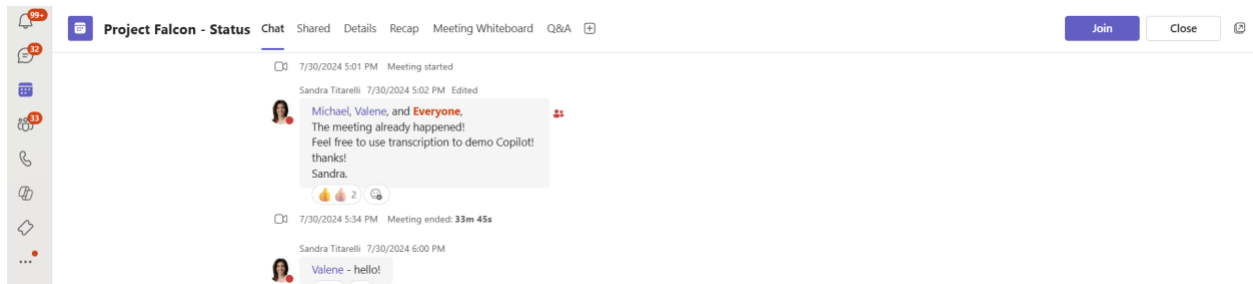

During a meeting, Use Copilot in Teams meetings to summarize key discussion points- including who said what and where people are aligned or disagree—and suggest action items, all in real time during a meeting. Catch up on what you have missed through a recap. If you are joining a recorded or transcribed meeting 5 minutes or more after it has started, you will see a notification to get a summary. Copilot in Teams will send a prompt a few minutes before a meeting's scheduled end to help participants wrap up. Participants can still make use of Copilot in Teams by asking if there are any unresolved issues or open topics from the agenda, or any other related questions that may help users to grasp the meeting wrap up. After a meeting, Copilot in Teams meetings will also be available once the meeting has ended in the meeting's Recap tab.

Copilot in Teams recently came out with an update to use Copilot in Teams without a recording. [This Microsoft Support link](#) will aid users in how to enable this feature.

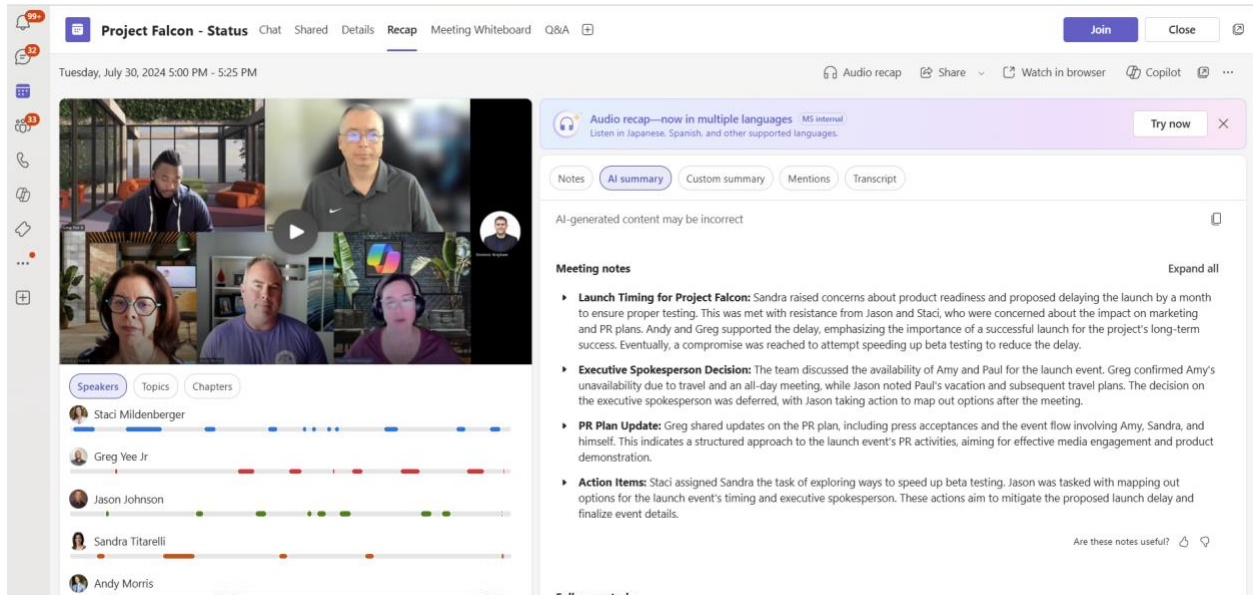

Use Case 1: Copilot in Teams After a Meeting

6.1. Click on the Manufacturing Teams Meeting that you recorded beforehand. If you don't want to record or transcribe confidential meetings in Teams, you can still engage with Copilot when it's set to "Only during the meeting" in your **Meeting options**. [Learn more about using Copilot without recording a Teams meeting.](#)

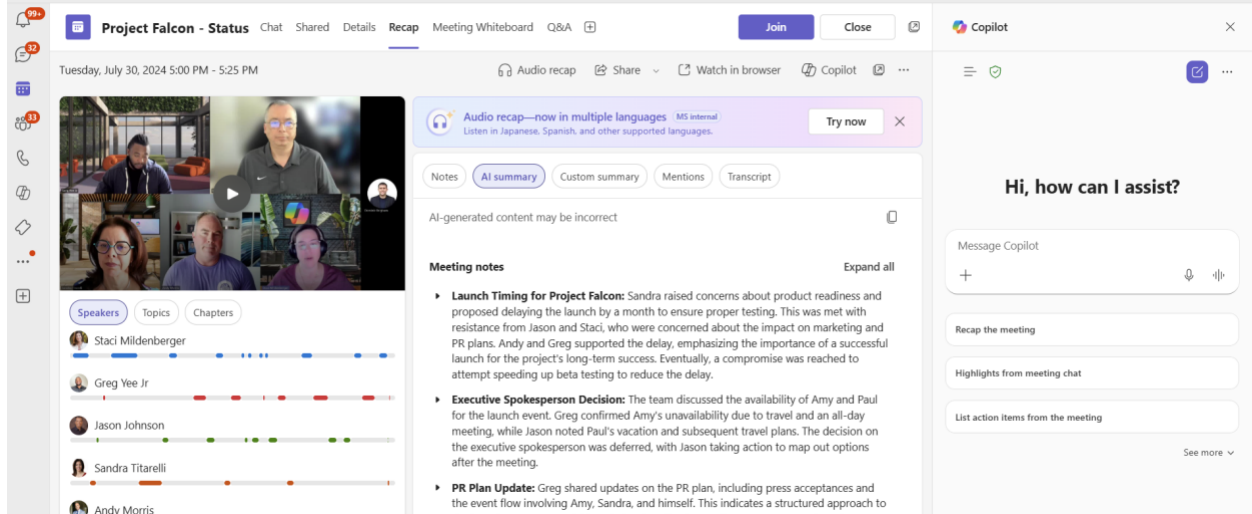

Note: For the presenters, attendees will not have this meeting in their calendar, but you will try the capabilities of Copilot in Teams. This meeting is an action item you will need to complete before the session.

6.2. Click on “View recap.”

6.3. Click on the Copilot in Teams button to open the Copilot sidecar.

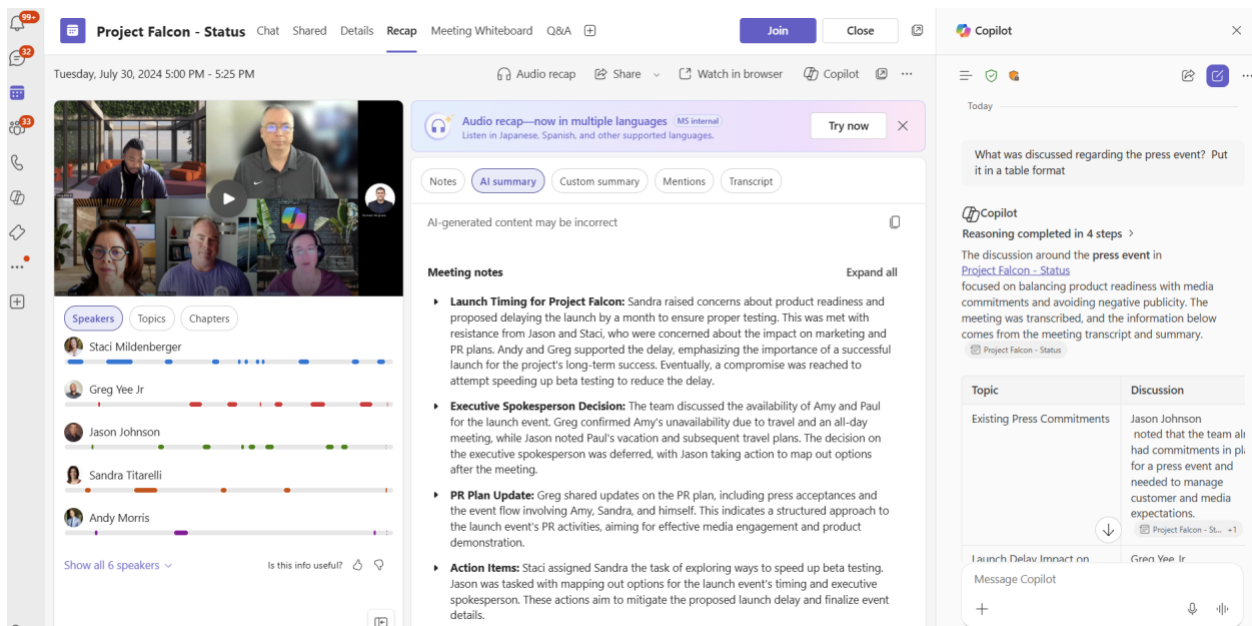

6.4. The Copilot in Teams sidecar will appear. This is the user's Copilot in Teams, and nobody else in the meeting can see their use of it.

Tip: The Copilot in Teams sidecar resembles the Meeting Chat. Ensure you're typing in the correct place to avoid posting prompts in the meeting chat.

6.5. Select 2-3 of the prompts below to highlight Copilot in Teams after a meeting. You can also click on "More prompts" to get some suggestions from Copilot.

- ***What was discussed regarding the press event? Put it in table format.***
- ***List action items and owners in a table format.***
- ***What was mentioned about executive speakers?***
- ***List the different perspectives by topic***

Topic	Discussion
Existing Press Commitments	Jason Johnson noted that the team all had commitments in place for a press event and needed to manage customer and media expectations.
Launch Delay Impact on	Greg Yee Jr

Note: These prompts are valid no matter which persona you were in the recording.

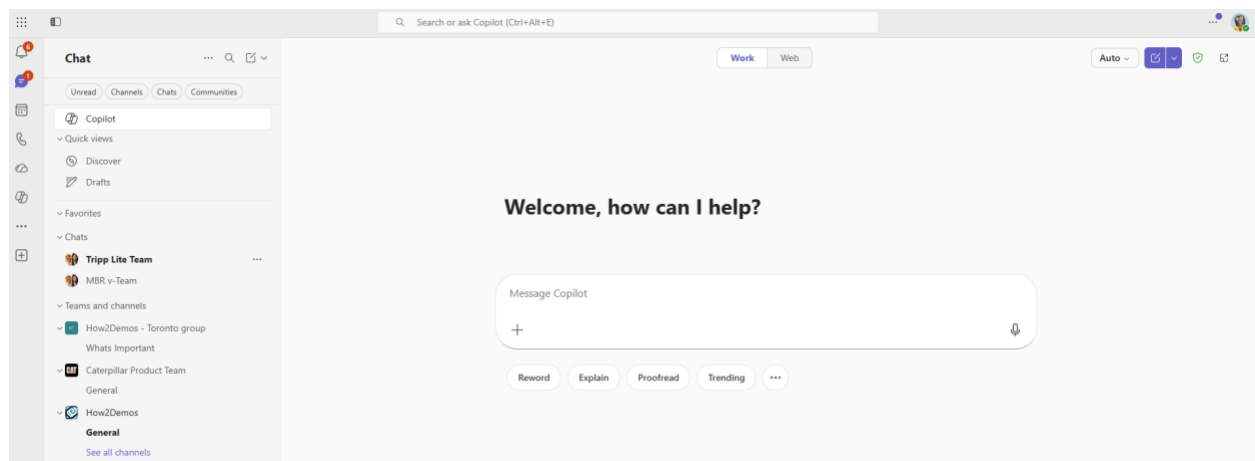

Use Case 2: Microsoft Copilot with Copilot Chat

6.10. While you are still in Teams, click on the Copilot icon at the top of your chats.

End users can also visit <https://m365.cloud.microsoft/chat/> and select Work.

Additionally, users can access it at <https://www.Microsoft365.com>. [This support resource](#) helps users understand different access points.

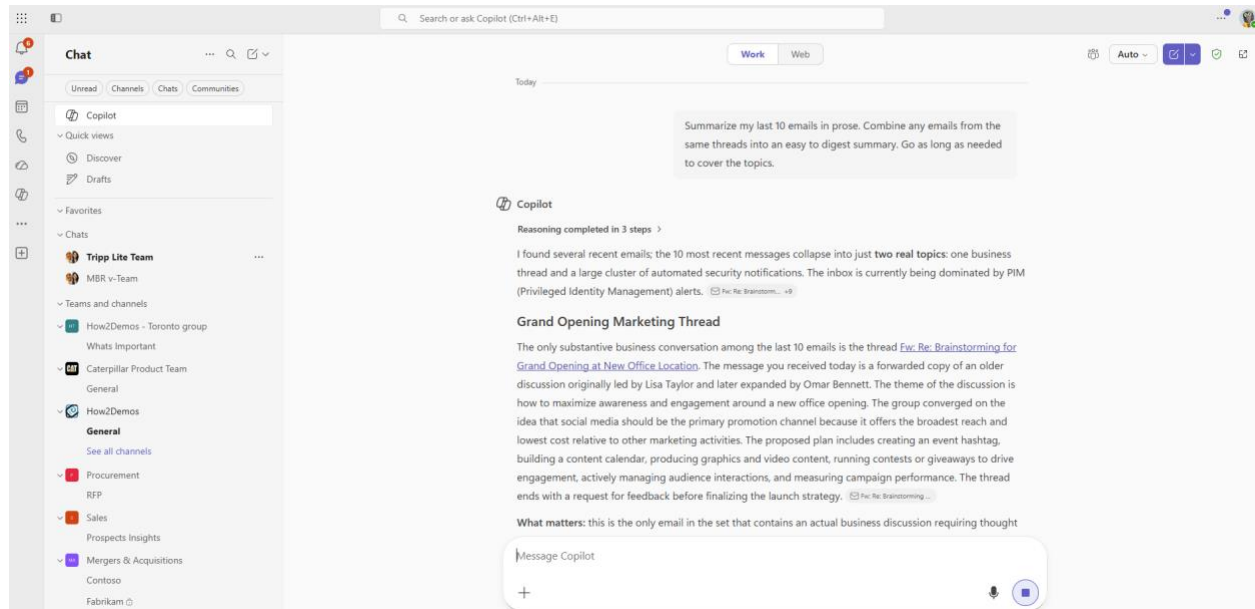

Tip: Continue to unlock the power of Microsoft Copilot Chat by visiting [Get started with Microsoft 365 Copilot Business Chat - Microsoft Support](#).

6.11. Type out the prompt below. This prompt will work for all users, as it summarizes the last 10 emails in their own inbox. The second prompt in this step takes the power of M365 Chat to the next level, showcasing the ability for Copilot to be very conversational.

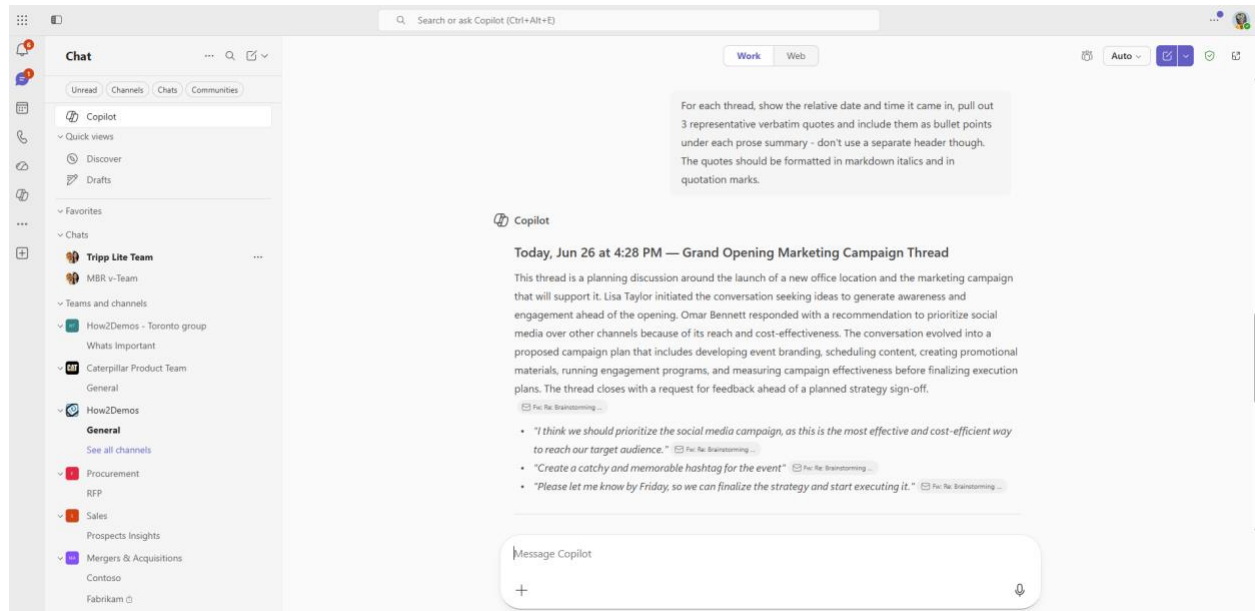

Initial Prompt:

“Summarize my last 10 emails in prose. Combine any emails from the same threads into an easy to digest summary. Go as long as needed to cover the topics.”

Second prompt:

“For each thread, show the relative date and time it came in, pull out 3 representative verbatim quotes and include them as bullet points under each prose summary - don't use a separate header though. The quotes should be formatted in markdown italics and in quotation marks.”

Bonus prompt:

“Summarize my mails, Teams messages and channel messages from the last workday. List action items in a dedicated column. Suggest follow-ups if possible, in a dedicated column.”

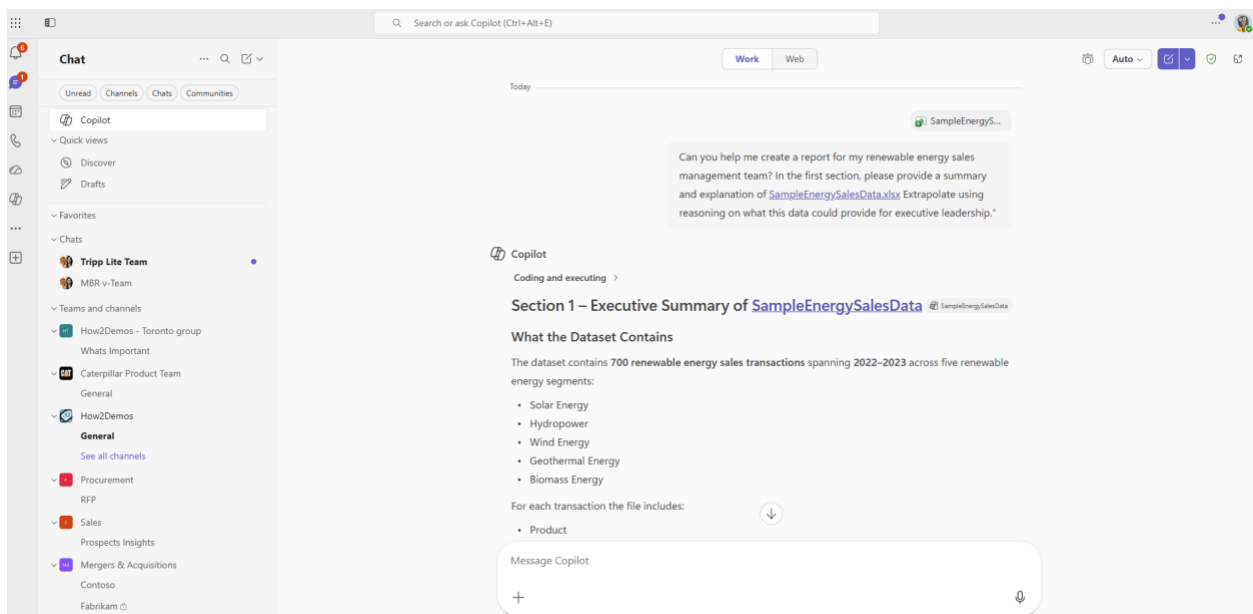

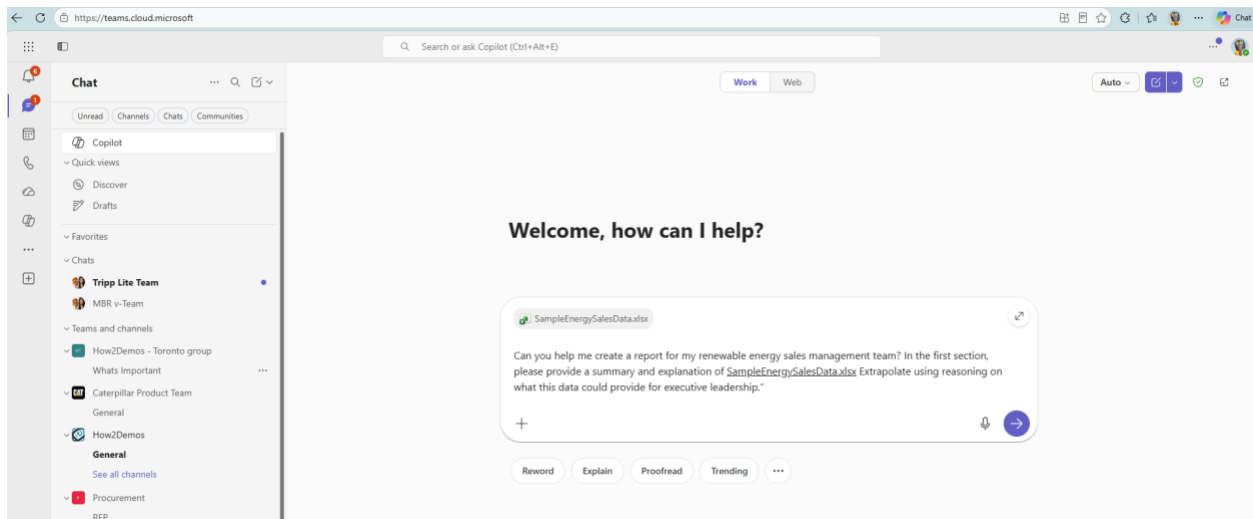

The table should look like this: Type (Mail/Teams/Channel) | Topic | Summarization | Action item | Follow-up. If I have been directly mentioned, make the font of the topic bold.”

6.13. Copilot Chat can also interact with the user’s documents. Users will interact with the Excel spreadsheet used in the Excel portion of the session.

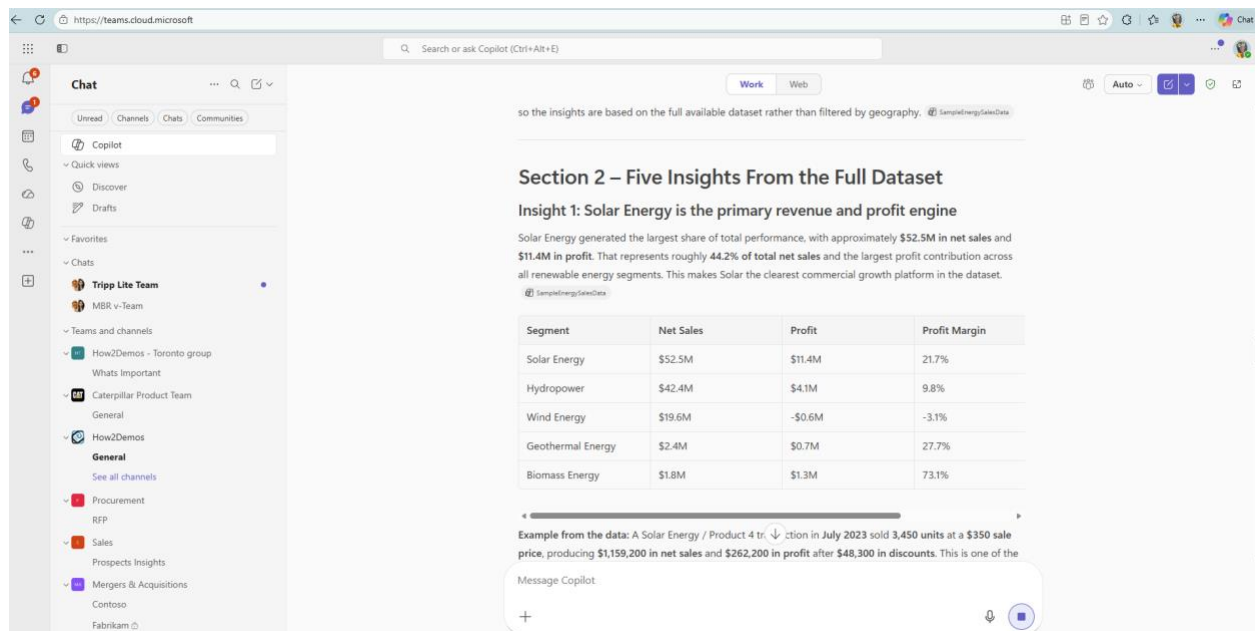

Prompt Microsoft Copilot with Copilot Chat:

“Can you help me create a report for my renewable energy sales management team? In the first section, please provide a summary and explanation of /SampleEnergySalesData.xlsx. Extrapolate using reasoning on what this data could provide for executive leadership.”

Second prompt:

“In the next section, please provide five insights from the entire block of data. Please do not exclude any countries from the insights. For each insight, it's very important that you show an example from the data you used. In the final section, it would be nice for you to provide any formulas you used and the assumptions you made for each insight.”

The screenshot shows a Microsoft Teams chat window with a Copilot-generated report. The report is titled "Section 2 – Five Insights From the Full Dataset" and includes an insight about Solar Energy being the primary revenue and profit engine. A table of energy segments is provided, showing Net Sales, Profit, and Profit Margin for various segments.

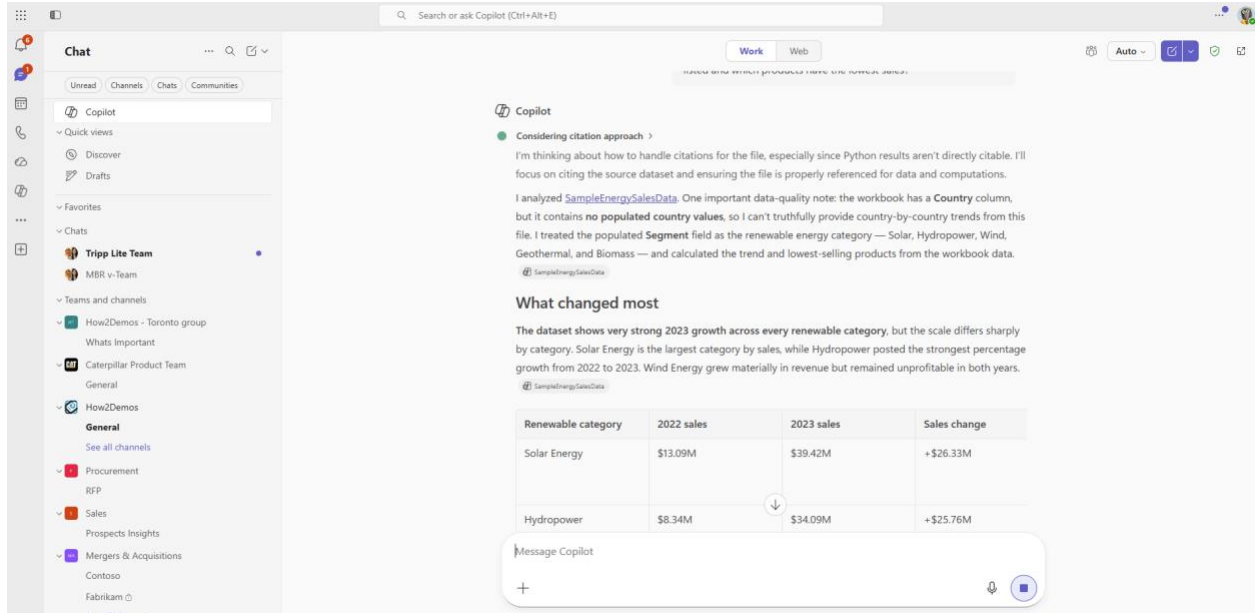

Segment	Net Sales	Profit	Profit Margin
Solar Energy	\$52.5M	\$11.4M	21.7%
Hydropower	\$42.4M	\$4.1M	9.8%
Wind Energy	\$19.6M	-\$0.6M	-3.1%
Geothermal Energy	\$2.4M	\$0.7M	27.7%
Biomass Energy	\$1.8M	\$1.3M	73.1%

Example from the data: A Solar Energy / Product 4 transaction in July 2023 sold 3,450 units at a \$350 sale price, producing \$1,159,200 in net sales and \$262,200 in profit after \$48,300 in discounts. This is one of the

6.14. Copilot will create a report and follow the sections that you described in the prompt. This includes a section on Summary, Insights, and Formulas/Assumptions. Copilot will generate slightly different content between users. This is expected- the content will still follow the reference document and structure that you specified in the prompt.

6.15. Prompt:

“I could really use your help in understanding global renewable energy trends. Using the same data in /SampleEnergySalesData.xlsx could you please provide trending information for each country listed and which products have the lowest sales?”

Considering citation approach

I'm thinking about how to handle citations for the file, especially since Python results aren't directly citable. I'll focus on citing the source dataset and ensuring the file is properly referenced for data and computations.

I analyzed [SampleEnergySalesData](#). One important data-quality note: the workbook has a **Country** column, but it contains no populated country values, so I can't truthfully provide country-by-country trends from this file. I treated the populated **Segment** field as the renewable energy category — Solar, Hydropower, Wind, Geothermal, and Biomass — and calculated the trend and lowest-selling products from the workbook data.

[SampleEnergySalesData](#)

What changed most

The dataset shows very strong 2023 growth across every renewable category, but the scale differs sharply by category. Solar Energy is the largest category by sales, while Hydropower posted the strongest percentage growth from 2022 to 2023. Wind Energy grew materially in revenue but remained unprofitable in both years.

[SampleEnergySalesData](#)

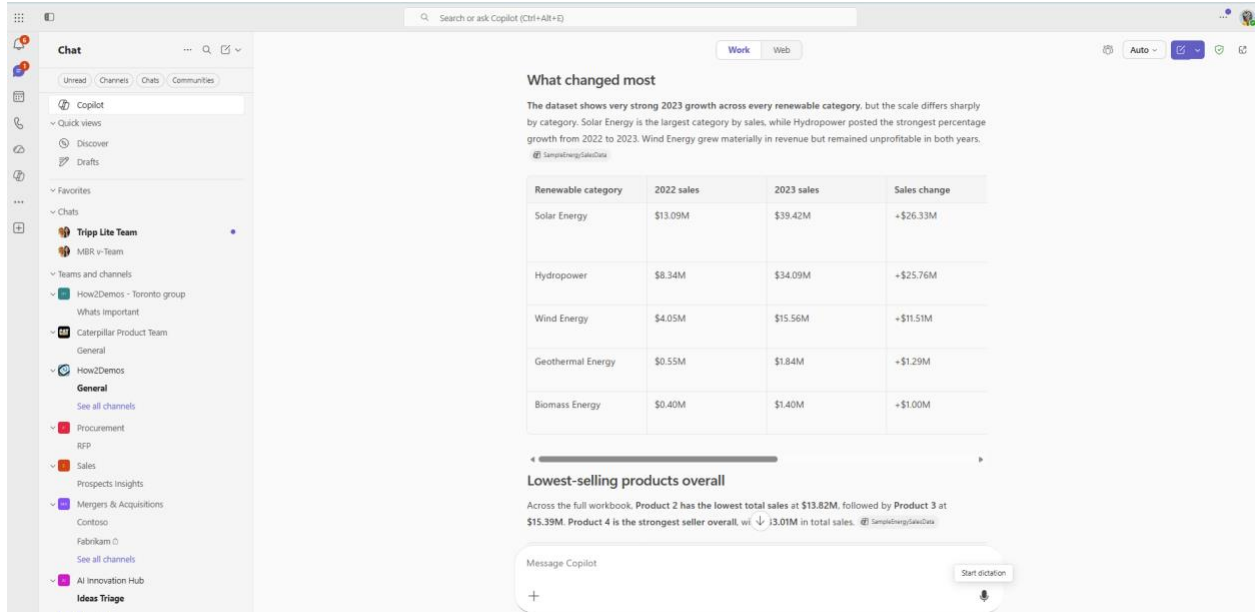

Renewable category	2022 sales	2023 sales	Sales change
Solar Energy	\$13.09M	\$39.42M	+\$26.33M
Hydropower	\$8.34M	\$34.09M	+\$25.76M

Message Copilot

+

Second prompt:

“Then in a separate section, please suggest what strategies we could use to optimize focus in improving lower performing product sales? What insights could we consider for seasonal trends? Or ideas that we can use to tailor our approach to different customer segments?”

6.16. Copilot will create the analysis and follow the sections that you described in the prompt. This includes a section on trending information, strategies, seasonal trends, and ideas. Copilot will generate slightly different content between users. This behavior is expected- the content will still follow the reference document and structure that you specified in the prompt.

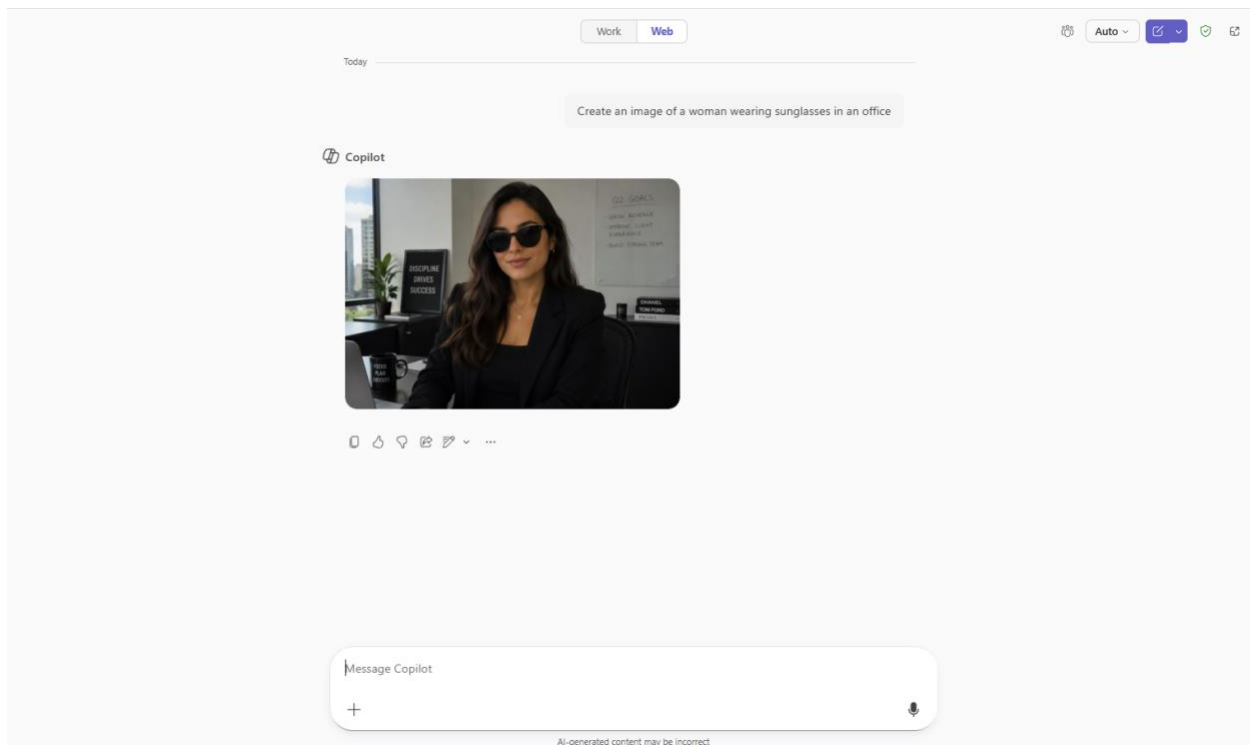

6.17. While Copilot Chat is grounded to your organization's data and the content you have access to, the "Web" tab does not have the same access.

6.18. Use the "Web" tab for any general generative AI prompts. While you are logged in with your Entra ID, you get the same enterprise data protection principles as the other Copilot enabled applications.

6.19. Type the prompt:

"Create an image of a woman wearing sunglasses in an office."

6.20. Type the prompt:

"What are 5 - 6 ways to beat procrastination?"

WorkWeb

Auto

Today

What are 5 - 6 ways to beat procrastination?"

 Copilot

Here are 6 practical, proven ways to beat procrastination—focused, actionable, and easy to apply:

1. Break Work Into "Starter Steps"

Instead of "finish report," define a tiny first step:

- Open the document
- Write 3 bullet points
- Draft the title

Why it works: The brain resists big, vague tasks—but small actions feel manageable and reduce mental friction.

2. Use Time Blocks (e.g., 25-minute sprints)

Try a simple structure:

- 25 minutes focused work
- 5-minute break
- Repeat 3-4 times

Why it works: Short, timed bursts create urgency and reduce the feeling of endless effort.
